

TORCH

CRANK LIGHT

Get to Know Your Gear

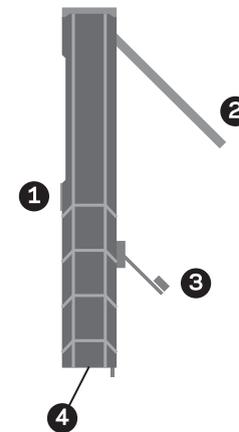

Getting Started

1. Be sure to **ACTIVATE YOUR WARRANTY** at www.GOALZERO.com/warranty
2. Open up the TORCH and collect a charge from solar, 12V, AC wall adapter or the dynamo hand crank.
3. Press button once to turn on front light, twice to turn on side panel, and a third time to turn off.

How to use your gear

- 1 On/Off Button**
Press the on/off button to change between modes and to power off.
- 2 Solar Panel**
Flip it out to use, and make sure that it is angled towards the sun.
- 3 Hand Crank**
Locate the hand crank underneath the flip-out solar panel. Pull it out of the slot and all the way parallel with the TORCH. Crank in any direction.
- 4 AC/12V Chargeable**
Charge from AC wall adapter or 12V car adapter.

Comes With

12V male car adapter
AC cord
DC cord

Frequently Asked Questions

Is my TORCH crank light waterproof?

It is water resistant and meant to hold up in inclement weather.

I can't find the crank handle. Where is it?

In order to make the TORCH as compact as possible, the crank handle is tucked under the flip-out solar panel.

How do I know if my TORCH is getting power?

Simply test the light by turning it on. If it is running low on juice, the light will be very dim and you should consider recharging. Red LED turns on when the TORCH is getting power.

Compatible With

GOAL ZERO products:

SHERPA power packs

ESCAPE power packs

NOMAD 7

NOMAD 13.5

NOMAD 27

**For use with a GOAL ZERO solar panel, a 12V female car adapter is required.*
