Helpful Hints

You only need to make one video connection to your TV in order to view DVD playback.

	Use this video cable(s)	If your TV has this video input jack(s)
1	supplied 	VIDEO IN
2	not supplied 	Component Video
3	not supplied 	S-VIDEO IN

If your TV has only a single Antenna In jack, you will need an accessory

RF modulator. The RF modulator converts the video from the DVD player so it can play through the TV's Antenna connector. Refer to your owner's manual for proper connection (see page 10 in the owner's manual).

... then play

Check the AV (Audio/Video) mode on your TV.

- * Usually this channel is between the lowest and highest channels and may be called FRONT, AV IN, or VIDEO.
- * Or, you may go to channel 1 on your TV, then press the Channel down button repeatedly until you see the Video In channel.
- * Or, your TV remote control may have a button or switch that chooses different video modes.
- * Do not use channel 3 or 4 on the TV unless you are using an RF modulator.
- * See your TV manual for more details.
