

Operational Safety Tips

INSTALL SPIKES SPIDER® traction equipment as described in the instruction booklet.

too low tire pressure

too high tire pressure

prescribed pressure

DO NOT exceed a maximum speed of 30 MPH

Air valves which exceed in length beyond the outer edge of the tire (see drawing above) have to be substituted by shorter valves.
Valve extensions have to be removed.

Avoid driving long distances on roads free of ice and snow

Avoid unnecessary full braking or wheel spin starts
