VisionTek Candyboard Bluetooth

VisionTek Part# 900335

The VisionTek CandyBoard Bluetooth is a Bluetooth wireless mini external keyboard with touchpad for PCs, Macs, IPhones, iPads, most SmartPhones, home theater systems, and popular gaming consoles.

Put the power of a full-sized keyboard, trackpad, and mouse in the palm of your hand!

With a 69 key QWERTY style keyboard, a capacitive-sensing touch pad, and navigation keys for menu scrolling convenience or gaming-style joystick action, the VisionTek CandyBoard Bluetooth is a powerful input and control solution sized slightly bigger than a candy bar.

It's a sweet replacement for the bulky, space-consuming keyboard and mouse typically used to control home theatre and family gaming set-ups. From its wireless range up to 30 feet to the LED backlit keyboard for comfortable use in low light conditions, this innovative, pocket-sized keyboard will bring new found enjoyment to your entertainment experience.

Small in size doesn't mean small in features however. The CandyBoard Bluetooth contains a rechargeable Lithium Ion battery that charges via the included USB cable with any standard USB equipped device. LED indicators let you know at a glance connection, charging, and battery capacity status. And with a Plug and Play design, you can use the VisionTek CandyBoard Bluetooth straight from the packaging with no set-up hassle.

SPECS:

Measurements: 5.8" x 2.25" x .25" (151mm x 59mm x 12.5mm)
