

Boat Cover Material & Application Guide

Please take a contoured measurement of your boat to find the best fitting cover. We ask that you measure from the front tip of your boat, up and over any obstacles such as bow rails, a windshield or high console all the way to the back of the boat. Once you have determined the length of your boat please take a contoured width measurement, measuring from rub rail to rub rail, up and over the windshield or the widest part of your boat.

Click on a boat type for more details.

*All of our semi-custom fit boat covers are designed to be used with trailering. Please make sure your cover is securely tied down. If cover starts to flap during trailering please secure cover to the boat before continuing your trip.

**All of our boat covers are backed by a Budge Industries Manufacturer's Warranty. Please note that warranty claims should only be filed for defective issues as we do not exchange for size, upgrade or offer refunds.
