Weight: 18g (unpacked)

Waterproof rate: IP67

Display Size: 0.49 & 0.91 inch OLED screen

Charge method: Standard USB charging

Battery: 40mAh polymer battery

Standby time: over 4 days

Introduction of smart wristband:

1) Download and Install App

2 Ways to Download and Install the App "Movnow plus" of the wristband To your cellphone

1. Search and Find the App name of "Movnow plus" from Android Market(Google Play Store) or Apple store
2. There are 2 two-dimension code on the back of the package box, use the phone to scan it and it will download and install directly.

2) Registration page

Open the APP and hit "My count" -> "New User", then Key in E-mail address for registration and then submit.

3) Binding device

After login, please hit "Connect and Sync"; Searching for paired device; Request for Bluetooth paired shows up; Password: 1234

Notes: Please make sure :

1. Your cellphone's Bluetooth is active(turn on);
 2. The wristband is beside on your side;
 3. The wristband is power on;
 4. Click the button on the left of wristband
- 4) Menu

Tap the menu on the left top of the home page enter the menu page, then you can manage your device as you like

5) Setting

On the setting menu, you can switch the counting metric unit between Kilometer and Mile, and also can check the software version and read the instructions

6) Recording and Synchronizing Data

1. Recording: Wristband will record your activity data when you turn on and wear it automatically
2. Synchronizing:
 - a. Your cellphone's Bluetooth is active(turn on);
 - b. Open the App "Movnow Plus";
 - c. The wristband is beside on your side;
 - d. Click the button on the left side of the DW64 wristband

Then the data will sync to your cellphone automatically

Warning:

Please keep the device or battery away from the sunlight, fire or other overheated environment.

Charging:

When you charge it, please make each needle align with each charging port, like the following picture shows.

Note: Please make sure the all 3 of charge point is clip on the charger.

Troubleshooting:

- 1) Sync up with app

The App "Movnow Plus" stable work and compatible with **iOS 6.1** and **Android 4.3** or above version. **If your cellphone's OS version lower or not running the 2 kind of OS will not use this wristband.**

If your phone uses the unofficial system version or has jailbreak operation, it will cause the unstable connection.

2) Bluetooth connection

The wristband is Bluetooth 4.1 version. You may know, any Bluetooth devices only can keep stable connecting within proper distance, in general, 10 meters(33 feet).

3) Website to go to

The ways you can go to the website to download the APP:

1. Logging into the product page --> Product Description, "App Installation" says clearly how to go to the website and then download the APP.

2. Logging into the product page --> Clicking the Main product picture, then you can see 8 pictures in total. The 8th picture shows the two-dimension code, which you can use your phone to scan. --> Download the APP

3. Scanning the two-dimension code the back of the package directly --> Download the APP

4) Counting accuracy

Counting accuracy depends on walking posture and manner. So, the wristband can't count, if the swing range of the arm is not obvious. At the same time, if the swing range of the arm is very obvious, the wristband will count, even if you are sitting or lying.
