Highlights

Car manufacturers' choice

For 100 years, Philips has been on the forefront of the automotive lighting industry, introducing technological innovations that have become standard on modern automobiles - Philips is the inventor of Xenon HID technology. Today, one in two cars in Europe and one in three worldwide is equipped with Philips lighting.

Commended Car lamps

Our lamps are often commended by automotive experts.

ECE homologation

Philips Automotive is dedicated to producing best-in-class products and services in the

Original Equipment Manufacturer market as well as in after-sales market. Our products are manufactured from high-quality materials and tested to the highest specifications to maximize safety and driving comfort of our customers. Our entire production is meticulously tested, controlled and certified (ISO 9001, ISO 14001 and QSO 9000) to the highest ECE requirements.

Maximum safety with Xenon HID

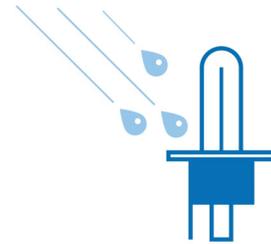

Xenon HID (High Intensity Discharge) lamps offer twice as much light* for safer driving in all conditions. The intense white light produced by the Xenon HID lamps is comparable to daylight. Studies have demonstrated that xenon automotive lighting helps drivers to concentrate on the road and to distinguish obstacles and road signs much faster than traditional lamps.

Original quality replacement

Philips Xenon Standard offers the original quality light performance of a new car. The quality of the bulb is endorsed by all major car manufacturers.

Resistance against humidity

Only a burning bulb made of quartz glass (filament 2650°C, glass 800°C) can resist thermal shocks : if a drop of cold water touches the hot bulb, which can happen when you drive through water with a broken headlight unit.

UV Resistant

Philips special anti-UV coating technology protects the headlights against harmful ultraviolet radiation, making Philips UV-coated quartz glass ideal for all driving conditions and ensures their longevity at the same time.

Specifications

Product description

- Technology: Xenon
- Application: High beam, Low beam
- Designation: D2R
- Homologation ECE
- Range: Standard
- Type: D2R
- Base: P32d-3
- Marking ECE: E1 03U

Electrical characteristics

- Wattage: 35 W
- Voltage: 85 V

Lifetime

- Life time: B3/Tc = 1500/2500

Light characteristics

- Lumens: 3000 ±250
- Color temperature: 4200

Issue date 2014-06-12

Version: 2.0.1

12 NC: 9285 015 29436
UPC: 0 46677 28969 0
