

Thermo Scientific Product Warranty

Thermo Scientific warrants that each product we sell you is free from defects in labor and materials and shall conform to its product specifications as defined in product user documentation.

If the product does not function as warranted during the warranty period, we will repair or replace it without charge. In the unlikely event that field service is unable to affect repair, an escalation process that systematically focuses our resources on instrumental or customer satisfaction issues is employed to expedite a rapid solution that is satisfactory to you.

Your GC, LC, GC/MS, or LC/MS system has a 12 month total equipment warranty. This warranty begins on the date that the installation acceptance form was signed. Extended warranty and support plans are available. Please contact your service or telesales expert for information.

Warranty Registration

Thank you for purchasing a Thermo Scientific™ instrument. It is important to register your instrument so that we may provide you with:

- Valuable information about product updates and enhancements.
- Information regarding software updates.
- Expediated services when you contact us for support.
- Important information regarding instrument lifecycle changes and changes in available service support.

To register your Thermo Scientific instrument, complete the form below. You may return to this form to register additional products. If you're interested in purchasing an extended warranty, check the box below and a representative will contact you shortly.
