Get started

Hello

Your Nokia device is your personal gateway to a world of endless possibilities. You can access the internet and Ovi services, as well as social networking services and stay in touch with your friends. You can always select the best option from the available networks and connection methods.

Your device comes with an internal GPS (global positioning system) antenna, so you can explore major cities and towns around the world. Use Ovi Maps to easily download maps, plan trips, and search routes to places of interest by address.

Your device also comes with a camera that you can use to chat with your friends live. Use Social hub to send messages and access social utilities.

Set up Windows

When you switch on your device for the first time, the welcome wizard helps you through the installation process. Follow the instructions on the display.

The graphics used in this guide for describing the setup phase are only for reference and may differ from the actual graphics you see on the display.

1. Run Windows 7

The Windows 7 operating system is preinstalled on your device. You are prompted to start the Windows 7 set-up during the first start-up. Follow the instructions on the screen. When you have finished the set-up process, the device is restarted using the settings you just defined. After the restart, your device is ready to be used.

You receive Windows upgrades automatically when you are connected to the network, if you have defined so in the settings. Upgrading the system may involve the transmission of large amounts of data, and data charges may apply. For information about data transmission charges, contact your network service provider.

2. Nokia Booklet software updater

Nokia Booklet software updater is preinstalled on your device. Nokia Booklet software updater checks weekly for available updates automatically after login. To download new software, follow the instructions.

Downloading new software may involve transmission of large amount of data. For information about data transmission charges, contact your network service provider.

3. Configure wireless connections

To view and select connection methods to use, and to activate or deactivate wireless connections, press **fn + F10**.

To connect to wireless LAN (WLAN) networks, open the wireless network connection dialog from the system tray, at the lower right corner of the display.

4. Social hub

Press **fn + F11**, and follow the instructions.

5. Sync your mobile device

To open Nokia Ovi Suite Installer and install Nokia Ovi Suite, select the icon on the desktop. With Nokia Ovi Suite, you can synchronize your Nokia Booklet 3G with a compatible device.

To synchronize, open Nokia Ovi Suite and follow the instructions.
