Wireless Digital Picture Frame

PIXSTAR

Welcome

You have just acquired a Pix-Star WiFi Photo Frame and we would like to thank you very much for your trust in our product and solution.

This Digital Photo Frame is a totally new generation of product with wireless capabilities and innovative features that we believe will delight you.

Using the product you will be able to easily share your best moments with your friends and family in just a few seconds wherever they are, at any moment. At the same time, this product includes the traditional features of a Digital Photo Frame which is the possibility to display pictures and other media files from USB memory stick and compatible memory cards.

We hope you will enjoy using our product. Do not hesitate to give us your feedback and suggestions by logging on our web site www.pix-star.com

Recommendations of use and safety warnings

Do not install your Digital Picture Frame close to a water source (minimum 1.50 m from a water source) or in a humid environment (such as bath room, laundry, kitchen, etc.).

This product has been designed to work inside a room or a house and cannot be used outside. Avoid installing the product in a dusty environment.

This product must be used in temperature between 10 and 35 .

Use this product only with the main power adapter provided together with the product.

The CE mark testifies that the product is in compliance with the main requirements of the European parliament and council directive 2002/96/EC for telecommunications terminals, user health and safety and for electromagnetic disturbance.

This terminal has been designed for private, indoor use (CPE customer premises equipment) within the European Union. It has been tested according to the technical dispositions for radio equipment (EN 300328). So the manufacturer declines all responsibility in case of non compliance with the current regulations in the country of installation.

The declaration of conformity can be consulted on our web site at www.pix-star.com or may be obtained by sending an email to support@pix-star.com.

> **Note:** the remote control is delivered with a 3V lithium battery
> already installed. Remove the plastic tab to start using the
> remote control. ATTENTION: this battery can not be recharged !

How to change the battery of the remote control

When the remote control has stopped working, please change its lithium battery (CR2025) by a new one.

1 Pull the battery draw out
At the back of the remote control press the small button on the side of the battery draw and pull it out at the same time.
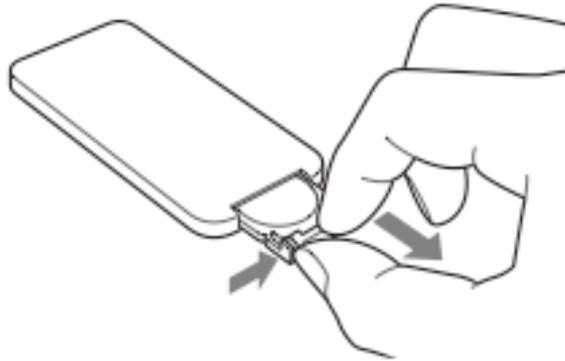

2 Take the used battery out of the draw, and then insert a new battery.
Insert the "+" side of the battery up
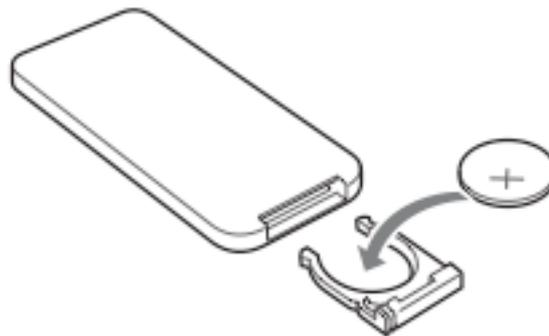

3 Put the draw back in the remote control

CAUTION
In case of bad manipulation the battery might explode. Do not attempt to reload it, disassemble it nor throw it into the fire.

2. Installation

First, plug the **AC adapter** in the DEVICE. Its plug is located on the side of the device. Then, plug the AC adapter to a **power line**.

To power on the device, move the switch **button** located on the side of the device, on the left. After that, the device should display a **logo** on its screen. Wait for a while, the device needs about 30 seconds before being ready to be used.

3. Introduction to the main interface

After you power the device on and wait for a while, pictures should be displayed.

Using the buttons behind the device, you can enter the menus and browse them. To open the main menu, press the **Menu** button twice. To enter the desired menu, press the ▶❚ button.

Note: The **Back** ↩ button on the remote control allows you to go back to the previous menu or to leave the main

---

4. WiFi and internet setup

4.1 Connect the device to the WiFi wireless network

Each device has a dedicated email address which makes it possible for the device to receive pictures directly from the Internet. To be able to receive pictures the device must be connected to the Internet through a WiFi gateway.

Here is how to do that using your WiFi network:

Press the **Menu** button to open the main menu. Scroll to the **Settings** item and press **Menu** again. Then scroll to the **WiFi settings** item and press " ▶ǁ ".

The device starts an **automatic scanning process** for available wireless networks.
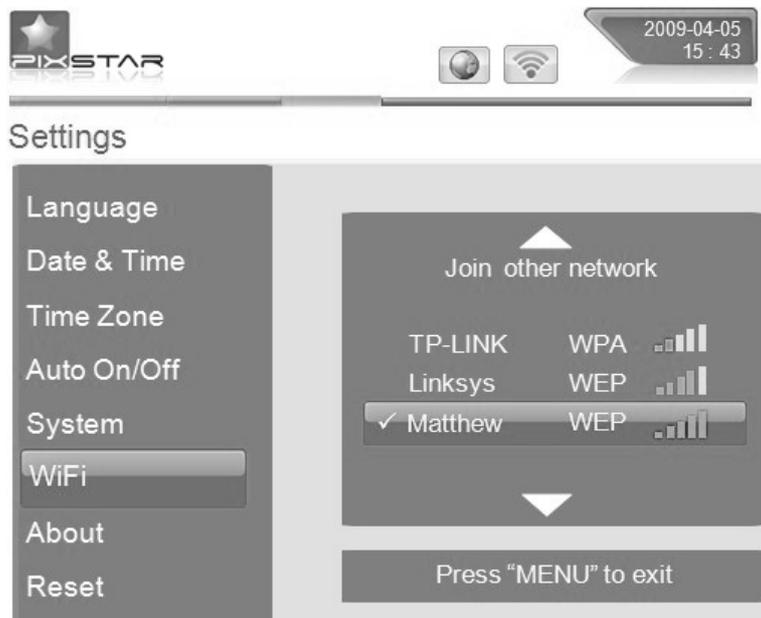

> **Note**: A DHCP server must be running on your network and provides an IP address to the device. Most personal WiFi networks run a DHCP server.

4.2 Register and manage the device on the WEB

If it is your first time using the frame, you should register online by following the instructions below:

Go to the Pix-Star webpage and click on "I want to register and choose an email address for my Pix-Star". Fill the form and your device will be ready to use! You can find the device ID in the Basic Information menu of the Settings menu of your device. Choose a password and the email address you want to be assigned to your device.

5. Receive pictures by email directly on the device

To put a picture in your device, simply send an email with your picture attached to the email address of your device directly.
When a new picture is received on the device, a small "Inbox" icon will be displayed on the upper right side of the screen.
If you choose to delete a picture on the frame, this one will still be backed up on the website. Therefore, you will be able to view it or to remove it permanently

> **Note**: You can send **several** pictures in the same mail but you must be sure that the size of your email does not exceed **20 Mbytes**.

6. Share pictures with friends directly on the device

The device allows you to share your pictures with your friends. To do so, press the ✉ button while the picture you want to send is displayed. Then, a menu composed of several items appears:

- To web albums: When you choose this item, the picture will be sent to selected web album. You will be able to see it in your personal area on the web site.

- To another Email : This item allows you to send the picture to another device or to an email address. Select it and input the email address you want to send the picture to.

- To my friends: this item is linked to your contact list (of your friend's frames or personal emails) which is recorded on the server. You can quickly send pictures to them by selecting them. If you want to add more contacts, log on the web site.

7. View pictures from your online albums on the device

The device is able to display a slide show of the pictures stored inside your online album created on the web site.

To manage the device associated album online, log on your personal area on the device web site. Choose the "My web albums" menu where you can upload new albums or delete some. You can also define which album to be displayed on the device.

Once the pictures have been uploaded onto the device web site they are visible immediately on the web site and after usually less than 1 minute on the device.

When in the web album slide show mode the device will automatically and periodically synchronize its content with the web site.

When a picture is added to the online web album, the device will later add it onto its local slide show. When a picture is removed from the online album the device later remove it from its local slide show. The update of the device with the online album is done at least every minute.

8. *How to use on the web site?*

- How to manage the automatic Sleep mode of the device?

Having your device turned on all day does not mean you are wasting energy!
In the "Power settings" menu, you can activate the automatic sleep mode of your device and decide when the LCD of your frame shall be turned on or turned off. Select "Activate daily auto switch on/off mode on my Pix-Star", and decide at what the time your device will be automatically daily switched on and off.

- How to select the weather forecast of the cities and countries of your choice?

From the website, you can choose how to display your forecasts on your device. In "Weather Forecast", each city will be ranked by country (where every country is an album). In "My weather" you can display in the same album a mix of cities and countries all together.
The weather forecast will be visible on the device in "My web albums"on the main menu.

- How to select and listen to your favorite web radio stations?

All web radio stations are accessible on the device sorted by genres and countries. Additionnally on the "Web radio" section of the web site, you can create customized playlists of your favorite radio stations directly on the device. Two options:
  o Create a playlist and select your radios in the predefined list. If your radio is missing, submit it to us by email at support@pix-star.com (please specify its name and its related URL)
  o Or link the audio stream of your own web radio!
How to proceed?
Every web radio is broadcast e d via a specified stream. If you add URL related to this stream you can listen to you web radio directly on the device.

- How to manage your contacts?

Easily adding contacts directly from www.pix-star.com will create a contact list visible from your device. It will be useful to send direct emails to your friends, no need to type their address on the frame. You can easily modify, add or delete a contact of this list.
Moreover, you can build groups, and instantly send your favorite photos to all the members of this group.

- How to filter your emails?

You may choose to apply filtering to all incoming emails to better control who is allowed to send pictures to your Pix-Star photo frame. You can choose the following options:

  o No filtering (Anyone who knows your Pix-Star email address can send pictures to your photo frame)
  o Refuse all incoming emails except the ones coming from the "white list" of your authorized persons
  o Accept all incoming emails except the ones coming from the "black list" of non authorized persons

9. Overview of other functionalities

The device includes the following useful functionalities:

- Pause

The device usually displays the pictures as an automatic **slideshow**. However, if you want to display a **single static picture**, you can interrupt the slideshow by choosing the Pause button of the main menu. To play the slideshow again, choose the **Play** item.

- Setting

Several options can be modified from the **Settings** menu.

- Removable devices

The device is also able to read pictures stored in a SD card or in a USB Mass storage dongle. Plug one of them in the device, select the right storage area in the files manager menu and choose browse the directories to find the one that includes your picture then click to display a slideshow composed of their pictures.

- Picture management

The device allows you to manage your pictures. Enter the files management menu and select the memory where your pictures are located. Then, you can perform several actions such as delete, Copy …

- Music

Music can also be played with the picture frame. Put some MP3 files on a SD Card or a USB Mass storage dongle and plug it in the device. Then, you can use the "My audio" menu to play your favorite music.

- Bluetooth

A Bluetooth dongle can be plugged in the USB port of the device and be used to transfer pictures. You can use any Bluetooth device such as mobile phone or PC to send your pictures to the device.
