Highlights

Zero interference with DECT

DECT technology guarantees zero interference from any other transmitting product like other baby monitors, cordless phones and cell phones. Data encryption provides a secure and private connection, so you can be sure that you are the only one that can hear your baby

Crystal clear sound

Hear every tiny giggle, gurgle and hic-up with perfect clarity. DECT technology provides high quality, crystal clear sound so you can hear your baby anytime

Smart ECO mode

The Smart ECO mode automatically minimizes your energy consumption and transmission power (not available in US and Canada)

Temperature sensor

The temperature sensor with customized alert allows you to monitor the climate in baby's room. Your baby can't regulate its body temperature as well as you can and a slight change in temperature can make your baby restless. A customized temperature sensor will immediately alert you, through the digital display on the parent unit, if the climate in your baby's room changes.

Sound activated lights

Lights are activated to indicate the level of sounds in your baby's room. Even when the Parent Unit is muted.

Talk back

Sometimes all your baby needs is the soothing sound of your voice. With one click of this essential feature you can connect with your baby from anywhere around the home

Range

Indoor range up to 50 meters* Outdoor range up to 330 meters* * The operating range of the baby monitor varies depending on the surroundings and factors that cause interference.
