

# Installation Instructions

## Wireless Motion Sensor LED Slim Light

### MB852-862

**Thank you** for purchasing the Mr Beams® Slim Light. We are committed to eliminating darkness using the latest in Light-Emitting Diodes (LEDs). LEDs are the most efficient and durable light sources available. We are certain that your light will contribute to a safer environment and provide light where you need it at a very reasonable cost.

#### What is included per light:

- 2 Slim Lights
- 4 Screws & 2 Strips of Double Sided Tape
- 2 Mounting Brackets

#### What you need to install:

- 4 AA-Cell Alkaline Batteries
- Screwdriver

#### Slim Light Features:

**Motion/Light Sensor:** Light instantly turns on when it detects motion from up to 7 feet away. The light sensor conserves battery life by preventing the light from activating in daylight.

**Auto Shut-off:** Light shuts off automatically after 20 or 60 seconds (optional) if no motion is detected.

**Bright LED:** 35 Lumens covers up to 10 sq ft.

#### Tips:

- Use only new alkaline AA-Cell batteries with 1.5V rating.
- Do not mix old and new batteries. If batteries are not new, it may cause the light to malfunction.
- Install batteries with polarity in correct position.
- Light may activate when batteries are inserted. Simply take light into a dark room. Allow motion sensor to settle, then test activation.
- **If your light is activating by motion too often, reposition light further away from traffic. Batteries will drain if this keeps occurring.**
- **If your light will not turn off, it means that it is time to replace the batteries.**
- **NOTE: This is a strong adhesive tape that may cause damage to paint, wallpaper, or surface underneath if removed.**

**NOTE: Light sensor only allows Slim Light to activate in darkness. We recommend you test in a dark room or closet.**

#### Battery Caution:

- 1) Do not mix old and new batteries
- 2) Do not mix Alkaline, Standard (Carbon-Zinc) or Rechargeable (Nickel Cadmium) or (Nickel Metal Hydride) batteries
- 3) Do not dispose of batteries in fire
- 4) Batteries should be recycled or disposed of as per state and local guidelines
