

Band User Manual

Last Updated: May 2015

Set Up

What's included? Each package contains a Band, USB charging cable, a 12-month subscription to Pivotal Living™ and device set up instructions.

How do I get started? How does it work? To get started, visit the [Apple's App Store](#) or [Google Play](#) to search for and download the "Pivotal Living" app. When you have located the app, follow the on screen instructions to download, install, register and begin using your new device. If you'd like to watch a quick video to help you get set up, please visit our [YouTube](#) channel. An internet/mobile connection is required and internet access fees or other service charges may apply, so please contact your provider for more information.

The Pivotal Living app and Band currently work with iPhone and Android devices. The band syncs with the following devices running iOS 8 and above: iPhone 4S+, iPod Touch 5, iPad 4, iPad Mini and iPad Air, as well as most Android 4.3+ mobile phones. *Note:* The full list of supported Android 4.3+ mobile phones can be viewed [here](#). Due to screen resolution scaling reasons, the Pivotal Living™ App does not formally support phablets such as the Note 4 or tablets such as the Google Nexus 7. However, in a concerted effort to make accessing Pivotal Living™ easy for our members, we have not technically restricted our members from downloading or side loading the Pivotal Living™ Android app to unsupported mobile phones, phablets and tablets. Please proceed at your own risk, with technical patience and please know that you may experience unsupported technical issues should you choose to access Pivotal Living on non-supported devices(s).

If you are searching on a supported iPad device, you may have to look within the iPhone apps to locate Pivotal Living or try this direct link in your browser: <https://itunes.apple.com/us/app/pivotal-living/id915189109?mt=8>.

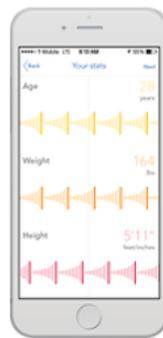

Wear

Before creating a new Member account, make sure your Bluetooth™ is powered on within your smartphone settings.

Activate

Tap the button on your band once to wake it up, this initiates the Bluetooth™ syncing process (~20 sec.)

Personalize

For an accurate experience, provide basic information about yourself. Slide your finger to adjust age, weight, and height.

Begin

Sync your data by pressing the button once on the band then swiue your finger down from the top edge of the mobile app Dashboard screen.

How do I charge my device? What is the battery life? Your Band comes equipped with a rechargeable lithium-polymer battery and you can check the level of your battery at any time on the band's display screen. When the band indicates the battery needs to be recharged, simply clip the supplied USB charging cable to the Band, and plug it into a USB port to begin charging the band. The Band will recharge to full power in less than 60 minutes. Please note that because overcharging can damage the band's battery, it is recommended that you do not charge the Band for extended periods of time (such as overnight), and that you plug the USB charging cable into a voltage controlled outlet, such as a laptop or

brand name wall charger. To ensure the most accurate tracking of members' sleep and daily activities, we recommend charging the band during the day while you are stationary, such as when reading a book or the morning paper, or while sitting at your desk at work. A battery icon will illuminate on the band to indicate that charging is occurring. You can check the level of your battery directly on the home screen of the device. *If you ever face charging issues, try changing your power source (eg if you tried charging via wall charger, try instead charging from a laptop or other power source).* Rest assured your lithium polymer battery is covered by our limited one-year warranty. For more details around this coverage, please visit our warranty details [here](#).

How do I turn on my device? Turn it off? After completing the first charge for 60 minutes, please push the device button for 5-10 seconds to turn the Band on for the first time. Once on, to turn the Band off at any time hold the device button for 5-10 seconds. Each time you turn on/off the band, the words "Pivotal Living" will show in the OLED screen. We made turning it on/turning it off a longer hold to help prevent our members from accidentally turning it off, knowing most people want to continuously track their activity. There is also a helpful [YouTube](#) video covering this [here](#).

Battery

Before setup, make sure your band is fully charged. A full charge takes 60 minutes and lasts approximately 5-7 days.

Power

Press and hold the button on your band for 5 seconds to power it on. Whenever syncing make sure to tap the button first to wake up your band.

How do I put on my device? Once your device has charged for at least one hour, place the wristband around the wrist on your non-dominant hand with the OLED screen on the outside of your wrist, facing you (similar to how you would wear a watch). Align both ends of the wristband so they are directly overlapping each other with the clasp over the two holes that best fit your wrist. Squeeze both the clasps and the wristband between your thumb and forefinger until you hear a click or the band is held in place. You'll know your Band is securely fastened when both ends of the band are fully inserted. If you are having trouble, try securing the band off your wrist to get a feeling for how it clasps and then try again on your wrist.

What size is the band? The Band is available in one unisex design and is optimal for wrist sizes 6 to 7 $\frac{3}{4}$ inches in circumference.

What materials are used to make the Band? Do you have any care and wearing tips? The Band is made of hypoallergenic thermoplastic polyurethane, a flexible, durable elastomer material similar to that used in many sports watches. It is latex-free and the clasp is made from metal with a coated chrome finish.

The Band is nickel free. While we do not anticipate an allergic reaction from the materials used in the Band, as with any type of jewelry, some people may experience reactions to bacteria accumulated on the band, or from a possible change in alloy content in manufacturing batches. To help avoid this, we recommend that you regularly clean your Band and discontinue wearing it should any irritation occur. Additionally, we recommend that you keep the fit of your band comfortably loose to allow for airflow between your skin and the band. Should you have any adverse reaction to the band, please discontinue using our product immediately.

On which hand I should I wear my device? To get the most accurate reading from your Band, it is recommended you wear your device on your non-dominant wrist. This will help ensure most day-to-day activities such as writing, washing dishes, throwing a ball or sipping your coffee don't inadvertently impact your personal health and wellness data reporting.

How do I set up my profile? After downloading and logging into the Pivotal Living™ app, you will be prompted to provide some basic information such as your Name, Language, Gender, Height, Weight and other basic information. The

more information you contribute to your profile, the more accurate your health and wellness reporting and recommendations will be. And the more you will learn about yourself. There is also a helpful [YouTube](#) video covering this [here](#).

How do I change time formats or between metric/imperial measurements? In “Settings” in the Profile section of the Pivotal Living you will find the toggle to change between imperial or metric measurement preferences. Selecting imperial measurements will activate imperial measurements within your app and change the clock on your band to a 12 hour format; selecting metric measurements will activate metric measurements and change the band time to 24 hour format. Make sure to sync your band for these changes to go into effect.

How to manage time zone? Reset the time? If you change time zones or if at any time the time on your band doesn't match the time on your mobile device, data from your Band will not sync and you will need to go to Profile > Settings > Reset Time and then sync your band to reset the time and band counters.

How do I sync my device? Your Band silently sends out a wireless signal once it is turned on. To sync your band with the Pivotal Living app, be sure Bluetooth® 4.0 is activated in your mobile phone settings. Press the band button once to turn on your device and initiate a sync within the Pivotal Living app, which is done by hitting the “Sync” button on the home screen for Android, or for iOS, pulling down on the top of the home screen and holding until the sync begins. This may take a few minutes and may require more than one attempt, however there will be a notification within the app when the connection is successful.

Please note that if at any time the time on your band doesn't match the time on your mobile device, data from your Band will not sync and you will need to go to Profile > Settings > Reset Time to reset the time and band counters. There is also helpful [YouTube](#) video covering this [here](#).

1

Open the mobile app and make sure Bluetooth™ is powered on within your smartphone settings.

2

Whenever syncing your band's data to the mobile app you must first press the button to wake it up -this initiates the Bluetooth™ signal from your band that's received by your phone.

3

Pull the screen down (iOS) or touch the sync button (Android) and the app will update with the latest data recorded from your band. During the sync the band will display the Bluetooth™ icon.

Once synced, your daily stats will display in the Dashboard screen of the app. Progress wheels represent your stats in relation to your goals set.

Time stamp of last sync and battery level of your band.

Where can I see my membership details? Each new membership product includes 12-months access to the Pivotal Living™ app and a complimentary Band device. Upon activating your device and logging into Pivotal Living™ app, your membership period begins and your app membership expiration date can be viewed in the “Settings” section of the mobile app.

What options will be available after the first year of membership to Pivotal Living?

At the end of your first year of membership to Pivotal Living™, we will offer members the opportunity to renew for another twelve months and get another complimentary device for \$12. We anticipate always having this \$12 renewal rate available for our members, however, we are also exploring alternative renewal options to offer flexible solutions for all of our members' needs. Stay tuned!

Does the Pivotal Living app and Band interface with 3rd party apps? We are committed to providing our members with the most accurate health and wellness data possible within our Pivotal Living™ app. At this time we are a closed platform and encourage all tracking to come through our app for the highest quality assessments. This also allows us to mitigate the impact of any bugs that other apps or platforms may have on our members' tracking accuracy and overall product experience with Pivotal Living™.

What are my options if my device gets lost or damaged? We know life happens. In the event that your device gets lost, damaged, stolen or otherwise disappears during your first year of membership, simply purchase a new 12-month membership to Pivotal Living™ and we will send you another complimentary device. Additionally, to ensure our members stay up on the latest technology, each annual renewal of your Pivotal Living™ membership includes a complimentary device and members can renew or purchase a new membership bundle at any time.

What if my charger gets damaged, lost or stolen? It happens and we get it! People lose or damage their chargers all the time. And just like mobile phone service providers, we offer replacement chargers for purchase online. Click this [link](#) to order.

How do I set up a warranty or replacement device? To start using your new warranty replacement device with your old user name and/or email address, please follow these quick steps: 1) Log into the app with your old credentials; 2) Navigate to settings and use the "Replace Band" function to replace the device associated with your account. Or, if you have an alternative email address or don't mind selecting a new user name, you can simply create a new account to start tracking immediately with your newly delivered replacement device.

How do I pair a new band to my account and gift my used band to another person? If whatever reason you decide Pivotal Living isn't a good fit for your lifestyle or you renew early to get another band, you can easily gift your old band to family member, friend or colleague. As soon as you use the "replace band" function within the app to pair your new band to your existing profile, your old band will be available for new user registration.

If I gift my used band to someone else, do they need to pay for a new year of service? No, if a used band is gifted to another person, at this time it includes 12 months of complimentary access to the Pivotal Living app.

How do I cancel & transfer my product to someone else? Will I be charged a membership renewal? Should you want to transfer your device and membership to a friend, family or colleague or simply discontinue using the product for whatever reason, rest assured we have you covered. Pivotal Living™ doesn't store credit card numbers, so there is no need to cancel nor will you be charged for a membership renewal without your consent. To free up your device and membership for future gifting or transfer to another person, please 1) log into the app with your old credentials; 2) Navigate to Profile > Settings and click "delete account". This quick two step action will allow the new person to start fresh and re-register your old device with their credentials.

What is the Power Member Program? How can I join? During our company's launch period, many of our members graciously demonstrated they're proven product enthusiasts and authentic brand advocates. The Power Member Program is your go-to home for early app updates, important feature/bug info, new hardware testing, and other key updates from our team. We also want empower our members to share success stories, fitness goals, and product feedback. Do you have a healthy aspiration that could inspire the larger Pivotal Living community? Care to share your

successful sleep data or improved workout habits? If you have a tip, trick or special story we would really love to hear from you. For more details about the Power Member Program or to join, click [here](#).

Can I be part of the app testing program if I don't have a Facebook account? Not at this time, as we use Facebook group functions to help facilitate technical feedback sharing to our engineers. We look forward to sharing an updated app version with our larger member community once testing has concluded.

About My Device & App

What are hero features for the Band? The Band is designed to do the basics very well and tracks many of the health and wellness indicators common in competitor devices. However, unlike most competing devices, the Band offers an OLED screen which provides a quick pulse on key performance indicators with the click of a single, touch-friendly button. The Band is simple, beautiful, motivational and easy to use.

Is the Band waterproof? Susceptible to other elements such as dust or prolonged sun exposure? Your Band is water resistant, sweat-proof, and rainproof. The Band is designed to protect against the elements, including warm sunny temperatures, direct light exposure and the occasional dust storm. Just like a smart phone and other mobile device, we wouldn't recommend exposing the device to wet conditions for long, wearing it in the shower, submerging it in water, or letting it free float in your fish tank.

What is the battery life? A full charge takes approximately one hour, depending on charging source. With normal use, your Band should last 3-5 days before needing a charge, depending on how frequently on-screen key performance indicators are accessed. It is not recommended you charge your Band for more than a few hours as prolonged charging may impact or impair battery performance.

What does the Band track? What shows on the Pivotal Living app? Your Band tracks steps taken, distance travelled, calories burned, hydration, sleep duration, and light vs. deep sleep. With an onboard OLED screen, the Band makes it easy to check basic key performance indicators on the go. Looking for more detailed information on-the-go or your personal trends? Access your personal daily and historical reporting directly in the Pivotal Living™ app to quickly identify changes for a healthier you. Rank yourself against friends and family by accessing the Teams section of the app, or increase your motivation and set new wellness goals by comparing your weight, activity and sleep with other people. To a quick [YouTube](#) video on getting started, please click [here](#).

Does the Band work if I cycle, do yoga or other non-step-based workouts? For each 20 minute time period when you do more than 500 steps, you add 20 minutes of active time to your home screen "Active Time" counter. Given the Band is designed to do the basics really well, including accurately recording data instead of making estimations, we do not have a manual activity entry option or track specific activities at this time. However, we know not everyone loves to run or walk, and that there are many ways our members chose to stay active. We are exploring additional activity features for future Pivotal Living™ devices and software updates, so stay tuned!

How do you interpret the sleep activity? Sleep quality is determined by movement throughout the night – more dips indicate tossing/turning. Flatter lines show deep, less disrupted sleep. Shallow U shaped curves show sleep disturbances, such as tossing and turning while deeper U shaped lines can indicate waking up.

What is active time? How is it calculated? Active time is designed to distinguish between regular steps and high intensity activity. You will see "active time" added to the app anytime you do more than 500 steps in a given 20 minute period. So keep moving!

How accurate is the Band? The Band’s accuracy is compatible with other health and wellness bands on the market. We recommend you wear your Band and carry your mobile device whenever possible to get the most accurate health and wellness data. While the Band captures different basic health indicators, the Pivotal Living™ app uses activity sensor data from your mobile phone to supplement data returned from the band to provide additional basic health and wellness reporting for a more complete picture for you.

Can I use the Band without the Pivotal Living App? The band relies on the app to set the clock and natural awake alarm but otherwise works independent of the app, to give our members flexibility during their busy days! You can use the OLED screen on the band to get a pulse on your daily activity metrics, but if you want a detailed look at your daily activity or sleep data, you need to open the app. Otherwise, the Band will simply act as a pedometer.

How do the app and the band work together? While the Band captures different basic health indicators, the Pivotal Living™ app uses activity sensor data from select mobile phones and other participating devices in our ecosystem to provide more detailed reporting. For example, for any given time period when you use both the Band and your mobile phone on a run, Pivotal Living™ is working hard in the background to collect both fitness band and phone steps data to surface two different step counts within the user app. Just navigate into the “steps” details section to see your motion data step count between your band and mobile device. As there may be periods of time during the day when you have your Band only, Mobile Phone or Other Mobile Device only, both devices, or none at all, it is not uncommon for your Band to show different numbers than what is reported in the app. For more information on how to set this motion data tracking up, there is a helpful [YouTube](#) video covering this [here](#).

Setup:

This feature is enabled in all [Android 4.4+](#) devices and does not require any configuring within phone settings.

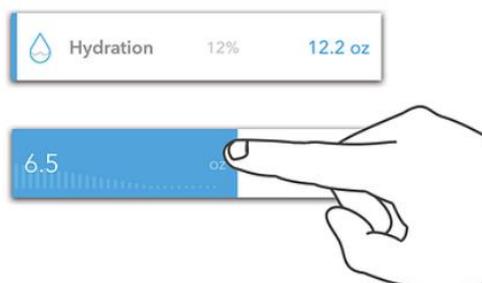

Motion Activity is available on Apple iPhone 5S, 6 and 6 Plus. To utilize phone data with the Pivotal Living mobile app, you will need to enable this feature within Apple iOS phone settings:

How do hydration and weight tracking work? Getting enough water every day and keeping tabs on your body weight is important for your long-term health. Tracking hydration and your weight is fun and easy with the Pivotal Living™ app! Simply drag your finger from the left side of the dashboard screen to log fluid ounces consumed or a once per day weight entry. There is a quick tutorial [YouTube](#) video demonstrating hydration entries [here](#) and another video demonstrating a weight entry [here](#).

Tip: Make sure your calendar settings on the home page are on the current day, since you can’t make entries for previous days...

How do goals work? When do they reset? Your Pivotal Living™ app comes preset with recommended goals, however goals can be manually by visiting Profile > Edit Goals within the app. Within the Pivotal Living™ app, it is also possible to compare your data against people your age, gender or by location. Your Band starts tracking your results and goal progress for the next day at 12:00 AM for the time zone selected in your mobile phone or other paired mobile device. This does not delete the previous day’s data: that data will be uploaded to your Pivotal Living™ app the next time you sync your Band device.

Your Band is designed to track your progress towards goals defined in your Pivotal Living™ app. Goals can be set for steps taken, calories burned, distance traveled, and other key performance indicators. You can only have one goal for each performance indicator at a time, but you can change goal values at any time in your Pivotal Living™ app.

What do the percentages mean? % achievement against your daily goals can be seen on the home screen once you are logged into the app. Percentages which exceed 100%+ indicate to what extent you have exceeded your personal goals. You can also see percentage results for friends and teammates on the networking tab. Why do we show percentages instead of actual results when comparing to other people? Since everyone has different body types, fitness backgrounds and individual goals, percentage of daily goals is a more relative comparison for people of different shapes, sizes and backgrounds. Just don’t set you goals too low!

How does the activity and natural awake alarm functions work? Your Pivotal Tracker vibrates to wake or alert you with its Silent Alarm feature. This alarm feature is set directly in your Pivotal Living™ app and can be configured to recur every day, or particular days of the week. Only one alarm time can be designated at a time. . Set the alarm and activity reminder within the app by visiting Dashboard > Band, and then syncing your Band with your mobile device. You will know the alarm is set on your Band when you see the “alarm icon” on the home screen of your band. There is also a helpful [YouTube](#) video covering this [here](#).

Figure 1: Natural Awake Alarm Settings

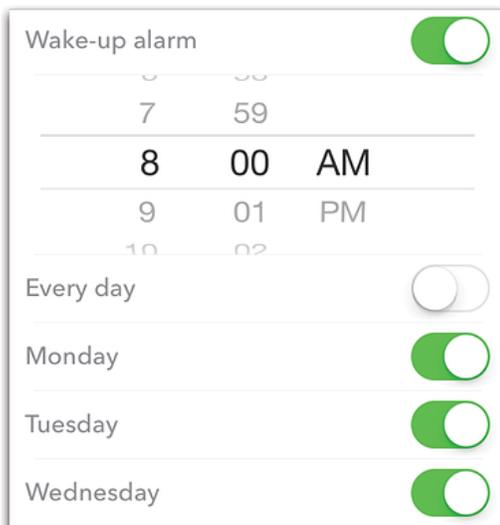

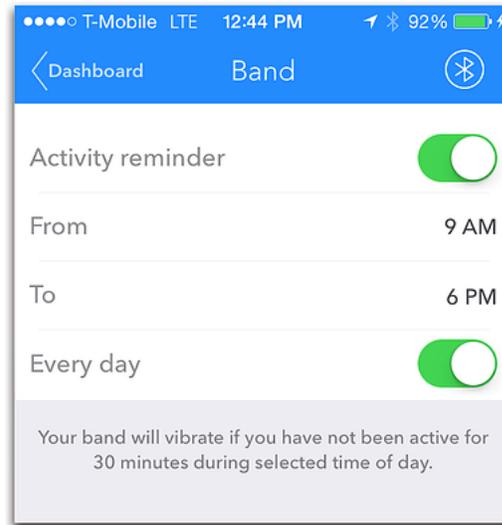

Figure 2: Activity Reminder Alarm

How does sleep tracking work? By collecting data from the Band, Pivotal Living can track the hours you sleep, as well as your movement during sleep to help you understand your sleep quality. To enter “sleep mode”, double click the button on your Band until you see the moon icon. The Band will vibrate as the moon icon appears to indicate that “Sleep” mode is activated. To enter active mode, double click the button on your band until you see the steps icon. There is also a helpful [YouTube](#) video for this [here](#).

Figure 1: Sleep Mode

Figure 2: Active Mode

Can I record naps in addition to sleep at night? Right now the app and band is only designed to capture overnight or one major sleep period each day, but we are keeping naps in mind for future app releases.

How much data does the device store? Which data is stored? When you sync your Band, your activity data is uploaded to the Pivotal Living™ app. Your Band holds detailed information from the most recent 3 days. Your recorded data consists of steps taken, calories burned, distance traveled, active minutes, percentage of daily goal, and sleep data. Sync your Band regularly to have the most detailed data available to view in Pivotal Living™ app.

How is privacy managed? Pivotal Living™ believes your data belongs to you. We carefully protect your data and take privacy seriously. You must accept a friend request in order for any of your data to be shared, and you can also choose what information is shared publically, with other friends/groups. You can update or change your privacy settings at any time within the Pivotal Living™ app. For more information, our Privacy Policy can be viewed on our home page (<http://www.PivotalLiving.com>)

What data is shown to other friends and members in your group? Can you control what data is shared? With Pivotal Living™, you always have control over your data, including which data is shared with friends, family, colleagues and other Pivotal Living™ community members. Data sharing and other privacy settings can be accessed via the “Settings” section of your Pivotal Living™ app and within the Team settings section if you are a Team Admin. Additionally, as you create and join teams, the Pivotal Living app will prompt you to set your sharing and privacy settings as you create teams under the “Networking” section of the Pivotal Living™ app and engage other members of the Pivotal Living™ community.

Why can't I track nutrition in the Pivotal Living software? Pivotal Living remains dedicated to providing accurate and streamlined health and wellness tracking; unfortunately apps and fitness trackers that monitor manually entered nutrition are not always accurate. We also believe that our products should not interrupt the daily flow of people's lives. We are actively exploring how to effectively tackle nutrition tracking using improved technology for more accurate nutritional details, and in a way that doesn't require behavioral change.

How do I set up and manage teams? Setting up teams is quick and easy. Check out this helpful [getting started guide](#) to get your team moving and motivated!

What are different ways to challenge myself and engage others within the Pivotal Living app?

- *Individual Challenge:* Track progress with one or more users to reach one or more goals. For example, you can [create a custom team](#) with your personal trainer so he or she can keep an eye on how you are doing before your next session. Imagine getting a message from your personal trainer telling you to keep up the good work or maybe to push you a little harder to reach your goals. What better motivation than that?
- *Custom Teams:* In this mode, [create a custom team](#) for your family, a running group, office pool or other team to allow users to motivate each other and push each other to reach your step goal or distance goal. Pivotal Living™ allows you to join as many different groups as you like. Groups can be anywhere from your family group to maybe even a group with your college alumni in it.

Can the Pivotal Living™ app support more than one user? Multiple devices? To balance making the Pivotal Living™ app easy to access while also providing an experience which protects our members' privacy, we do not recommend members pair multiple Band bands to the same mobile device. Because of software protocol differences between Android and iOS, we do not recommend you sync your device or run the app on more than one platform.

Can I pair more than one Band to my user profile? At this time, only one Band can be associated with an individual member's account. However, multi-device support is something we are exploring for future releases.

How can I reset my password? You can reset your password via the "Password Reset" option inside of the Log In screen of your Pivotal Living mobile app.

What if I have another account issue? Life happens. People mistype their email (inadvertently or unknowingly) during registration. They may forget the log in email they used to register their account. Or otherwise experience an account log in issue. Rest assured we have your back! If you have an account issue other than a password reset, please:

- 1) Select the "Other Account Issue" option on the log in screen
- 2) Once there, hit the "Scan for device code" button while simultaneously tapping the button on your band. This scans the unique serial code from inside your band and populates it on the "Device Code" line for our customer experience team to find you!
- 3) Fill out the field "Your Email" with the email used to register or other best email in case our customer experience team needs to message you.
- 4) For the request field, select "Delete My Account" if you are completely locked out, would like to start from scratch and are ok with losing your historical data. If you would not like your account deleted, please select the "Other" option and write any special requests to our support team in the "Your Message" field.
- 5) Click "Send" to finish! Our team will follow up in 24-72 hours, per our Monday to Friday 9-5pm PST business hours of operation.

Can I use the Band without the Pivotal Living App? The band relies on the mobile phone app to set the clock and natural awake alarm but otherwise works independent of the app, to give our members flexibility during their busy days! You can use the OLED screen on the band to get a pulse on your daily activity metrics, but if you want to look at detailed data or sleep data, you need to open the app on a mobile phone. Otherwise, it will simply act as a pedometer.

How can Pivotal offer both a 12-month membership to the Pivotal Living app and Band for just \$12? Our model is different than our competitors; our end goal is different than our competitors. At Pivotal Living we entered the health and wellness tracking space because we knew there was a void we could help fill; we believe if we can make tools like the Pivotal Living™ app and the Band available for the masses, we can help people improve their lives, make good choices and integrate smart wellness decisions into their daily routine. And we want to do it at a price point that was accessible to everyone. At the heart of our model is our Pivotal Living™ software membership. We don't believe in charging a high upfront cost for our products, and instead hope that our members will be members for life.

What options will be available after the first year of membership to Pivotal Living? At the end of your first year of membership to Pivotal Living™, we will offer members the opportunity to renew for another twelve months and get another complimentary device for \$12. We anticipate always having this \$12 renewal rate available for our members, however, we are also exploring other alternative renewal options to provide our members with flexible solutions which best meet their needs. Stay tuned!

Where is my order? Packages can sometimes go missing, even though all orders are shipped via UPS / USPS Priority mail and emailed tracking numbers. Should your product go missing, we recommend contacting your local post office with your tracking number to see if they can provide more information and/or if you need to open a lost package claim with UPS / USPS.

What is the cost for shipping & handling? Shipping for all Band bands in mainland USA is \$3.50 per band. For Alaska and Hawaii orders, the rate is \$5 per band. This cost reflects recent inflation and fuel surcharge price increases from the major carriers, delicate ground handling and packing of your Pivotal Living™ product by a friendly member of our operations team and includes tracking. For orders of 50 bands or more, bulk shipping may be available. Please visit the Pivotal Living™ [enterprise page](#) for more details.

Do you ship internationally? For the time being, we are razor focused on successfully launching the Pivotal Living™ app and Band domestically in the US. However, we are committed to exploring international market expansion in the near future. Be sure to follow us on social media, as we will be sure to announce any updates there.

Can I cancel my order? If we receive and confirm your cancellation request before your shipping label is printed and your order ships, we can definitely cancel your online order. If at any point you wish to discontinue your Pivotal Living™ Membership, you can simply deactivate your account within the Pivotal Living™ mobile app and gift your Band and remaining membership to a family member, friend or colleague.

Can I purchase a Pivotal Living membership and Band as a gift? Yes, what better gift than a membership to a health-conscious lifestyle? Everyone loves an accountability buddy, so gifting will help make finding friends, family members, and colleagues within the app that much easier. You can even start a team to get fit and meet goals, cheering one another on or building a little friendly competition to make moving more fun.

What are my options if my device gets lost or damaged? We know life happens. In the event that your device gets lost, damaged, stolen or otherwise disappears during your first year of membership, simply renew for another 12 months and we will send you another complimentary device, and add any remaining membership tied to your first device to your account. Additionally, to ensure our members stay up on the latest technology, each annual renewal of your Pivotal Living™ membership includes a complimentary device.

Who do I contact for large orders, corporate wellness programs, research engagements or other business development opportunities? Pivotal Living™ was built with these use case scenarios in mind! Please contact our [Enterprise team here](#) for more information.

What is your warranty and returns policy? Pivotal Living's warranty protects against unforeseen technical issues and further warrants the band is free from defects in the materials, manufacturing, and workmanship for a period of one (1) year from the date of shipment. Our warranty is published on our home page (<http://www.PivotalLiving.com>). Should you have a device with a material defect or warranty related issue please visit our warranty page learn more about our hassle warranty product exchange program and explore your coverage options.

What is your refund policy? Unless noted otherwise on a special case-by-case basis, Pivotal Living does not process refunds for non-warranty issues. This has been our policy since we began accepting orders and was instated as part of commitment to keeping our pricing low for our members. If for whatever non-warranty related reason the product isn't a good fit, we encourage you to delete your account within the Pivotal Living™ mobile app (Settings > Delete Account) and gift your Band and remaining membership to a family member, friend, or colleague. Any unauthorized returned product will be donated to local charities and non-profits. For more information on this and other posted policies, please visit our website www.PivotalLiving.com.

What is your privacy policy? Our privacy policy is published on our home page (<http://www.PivotalLiving.com>).

What is your EULA (End User License Agreement)? By purchasing and using our products, you agree to the terms and conditions of our end user license agreement, which is published on our home page (<http://www.PivotalLiving.com>).

General Information & Product Specifications

What is the size and weight of the product? The Band is available in one size and optimal for wrist sizes 6 to 7 ¾ inches in circumference. The band itself + USB charging cable weighs approximately one (1) ounce.

What are the optimal environmental conditions for band and app usage? The Band is recommended for use between -4° to 113° Fahrenheit (-20° to 45° Celsius) and is water resistant, sweat-proof, and rainproof. The Band is designed to protect against the elements, including warm sunny temperatures, direct light exposure and the occasional dust storm. Just like a smart phone and other mobile device, we wouldn't recommend exposing the device to wet conditions for long, wearing it in the shower, submerging it in water, or letting it free float in your fish tank.

Our hardware engineers recently confirmed that accumulated static electricity generated from friction between clothing fabric and the surface of the wristband, as well as static electricity from carpeted home or office environments may cause the Band to randomly reset for a small percentage of our member base. Should this issue regularly impact you, you can submit a refund/warranty exchange claim [here](#).

Where do I go for help? For troubleshooting, help and "how to" content, please visit our [support page](#) or to share your product experience or connect with other Pivotal Living™ members on support topics, there is a [member hosted support forum on Facebook](#). Special thanks to Ashley, Derek and Tracy and participating members for pioneering this [great resource](#)!

Regulatory & Safety Notices

Model Name: Band

Federal Communications Commission (FCC) Statement: This device complies with FCC part 15 FCC Rules. Operation is subject to the following two conditions: 1. This device may not cause harmful interference and 2. This device must accept any interference, including interference that may cause undesired operation of the device.

FCC Warning

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful

interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult Pivotal Living™ support or an experienced radio/TV technician for help.

This device meets the FCC and IC requirements for RF exposure in public or uncontrolled environments.

Important Safety Instructions

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not attempt to open the Band. Substances contained in this product and/or its battery may damage the environment and/or human health if handled and disposed of improperly.
- Do not tamper with your Band.
- Do not charge your Band for more than 3 hours; prolonged charging may impact or impair battery performance.
- Do not use abrasive cleaners to clean your Band.
- Do not place your Band in a Dishwasher, Washing Machine, Dryer, or other household appliance.
- Do not expose your Band to extremely high or low temperatures.
- Do not use your Band in a sauna, Jacuzzi, or steam room.
- Do not leave your Band in direct sunlight for an extended period of time.
- Do not leave your Band near open flames.
- Do not dispose of your Band in a fire or trash compacting device. The battery could explode.
- Do not attempt to disassemble your Band, it does not contain serviceable components.
- Never allow children or infants to play with the Band; the small components may be a choking hazard.

Built-in Battery Precautions

Do not attempt to replace your Band battery. It is built-in and not changeable.

- Charge the lithium polymer battery in accordance with the instructions supplied by Pivotal Living.
- Use only the USB charger that shipped with your product to charge the battery.

- Do not attempt to force open the built-in battery
