1. Overview

M. Low battery symbol

K. Battery compartment

J. 2 - 3 minutes and then take a new measurement.

H. Apply the arm cuff correctly.

G. To cancel a measurement, press the START/STOP button to release the air tube.

F. The batteries have empty. Replace the batteries with new ones at once.

E. The batteries are not applied.

D. Arm cuff not applied.

C. Clothing is interfering during measurement.

B. The batteries are insufficient.

A. The arm cuff has not been inflated sufficiently.

3. Taking a Reading

1. **1.** Press the power button to turn on the unit.

2. **2.** Sit upright with your back straight.

3. **3.** Remove the arm cuff.

4. **4.** Place the arm cuff around the arm.

5. **5.** The arm cuff is connected into the main unit.

6. **6.** After completion of measurements, take out battery and dispose of it.

7. **7.** Press the power button to turn off the unit.

8. **8.** Always take a new measurement 2 - 3 minutes after taking the previous measurement.

4.4 Storage

1. **1.** Do not carry out repairs of any kind yourself. If a defect occurs, consult your local OMRON representative.

2. **2.** Do not inflate the arm cuff over 299 mmHg.

3. **3.** If the unit is wet. Note: Please check with your local OMRON representatives for the correct (+/-) polarity.

4. **4.** Insert the batteries with the correct (+/-) polarity.

5. **5.** If the batteries are empty, replace them immediately.

6. **6.** If the batteries have empty. Replace the batteries with new ones at once.

7. **7.** If the batteries are insufficient. Replace the batteries with new ones at once.

8. **8.** If the batteries are not applied. Replace the batteries with new ones at once.

9. **9.** If the arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

10. **10.** If the arm cuff has not been inflated properly. Replace the arm cuff with new one.

11. **11.** Arm cuff not applied. Replace the arm cuff with new one.

12. **12.** Clothing is interfering during measurement. Replace the arm cuff with new one.

13. **13.** The batteries have empty. Replace the batteries with new ones at once.

14. **14.** The batteries are not applied. Replace the batteries with new ones at once.

15. **15.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

16. **16.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

17. **17.** Arm cuff not applied. Replace the arm cuff with new one.

18. **18.** Clothing is interfering during measurement. Replace the arm cuff with new one.

19. **19.** The batteries have empty. Replace the batteries with new ones at once.

20. **20.** The batteries are not applied. Replace the batteries with new ones at once.

21. **21.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

22. **22.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

23. **23.** Arm cuff not applied. Replace the arm cuff with new one.

24. **24.** Clothing is interfering during measurement. Replace the arm cuff with new one.

25. **25.** The batteries have empty. Replace the batteries with new ones at once.

26. **26.** The batteries are not applied. Replace the batteries with new ones at once.

27. **27.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

28. **28.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

29. **29.** Arm cuff not applied. Replace the arm cuff with new one.

30. **30.** Clothing is interfering during measurement. Replace the arm cuff with new one.

31. **31.** The batteries have empty. Replace the batteries with new ones at once.

32. **32.** The batteries are not applied. Replace the batteries with new ones at once.

33. **33.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

34. **34.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

35. **35.** Arm cuff not applied. Replace the arm cuff with new one.

36. **36.** Clothing is interfering during measurement. Replace the arm cuff with new one.

37. **37.** The batteries have empty. Replace the batteries with new ones at once.

38. **38.** The batteries are not applied. Replace the batteries with new ones at once.

39. **39.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

40. **40.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

41. **41.** Arm cuff not applied. Replace the arm cuff with new one.

42. **42.** Clothing is interfering during measurement. Replace the arm cuff with new one.

43. **43.** The batteries have empty. Replace the batteries with new ones at once.

44. **44.** The batteries are not applied. Replace the batteries with new ones at once.

45. **45.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

46. **46.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

47. **47.** Arm cuff not applied. Replace the arm cuff with new one.

48. **48.** Clothing is interfering during measurement. Replace the arm cuff with new one.

49. **49.** The batteries have empty. Replace the batteries with new ones at once.

50. **50.** The batteries are not applied. Replace the batteries with new ones at once.

51. **51.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

52. **52.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

53. **53.** Arm cuff not applied. Replace the arm cuff with new one.

54. **54.** Clothing is interfering during measurement. Replace the arm cuff with new one.

55. **55.** The batteries have empty. Replace the batteries with new ones at once.

56. **56.** The batteries are not applied. Replace the batteries with new ones at once.

57. **57.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

58. **58.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

59. **59.** Arm cuff not applied. Replace the arm cuff with new one.

60. **60.** Clothing is interfering during measurement. Replace the arm cuff with new one.

61. **61.** The batteries have empty. Replace the batteries with new ones at once.

62. **62.** The batteries are not applied. Replace the batteries with new ones at once.

63. **63.** The arm cuff has not been inflated sufficiently. Replace the arm cuff with new one.

64. **64.** The arm cuff has not been inflated properly. Replace the arm cuff with new one.

65. **65.** Arm cuff not applied. Replace the arm cuff with new one.

66. **66.** Clothing is interfering during measurement. Replace the arm cuff with new one.
