The OMRON HEM-7113 is a fully automatic blood pressure monitor, operating Safety Information in this instruction manual before using the unit.

Intended Use
The unit also stores up to 14 measurements in memory.

Important Safety Information
General considerations
- Do not use the unit if it is damaged with scratches or dents.
- Please handle the unit carefully while using the unit.
- When using the unit, please follow the instructions in this manual. Disregarding the instructions may cause damage to the unit.
- The unit is not intended for use in a hospital or medical environment.
- The unit is not intended for use by individuals with severe impairments or disabilities.
- The unit is not intended for use by individuals who are unable to understand the instructions.

Warning:
- Arteriosclerosis.

Important:
- Your blood pressure monitor includes an irregular heartbeat feature. If you experience irregular heartbeats during measurement, the irregular heartbeats symbol ( ) will be displayed on the right arm of measurement.

Note:
- If your systolic or diastolic pressure is extremely low (or extremely high), please consult your doctor.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity. Electric Shock
- Do not use in locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.
- If the unit is wet.

Note:
- Do not inflate the arm cuff too high.
- Gently fold the air tube into the arm cuff in a spiral shape without stretching the air tube. If the air tube is not the right length, the measurement result may not be accurate.

Note:
- Please make sure that the air tube is not wrapped around other parts of your body when taking measurements. This could result in injury when the air pressure in the air tube is released.

Note:
- Remove any clothing interfering with the arm cuff. Consult your local authorized OMRON distributor or dealer.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity.

Note:
- Locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- The unit should be cleaned with a soft, dry cloth. Use a soft, moistened cloth and soap to clean the arm cuff.

Note:
- If the problem continues, try replacing the batteries.

Note:
- Do not apply more pressure than necessary.

Note:
- If the memory is full, the monitor will delete the oldest readings.

Note:
- Do not use the unit if it is damaged with scratches or dents.
- Please handle the unit carefully while using the unit.
- When using the unit, please follow the instructions in this manual. Disregarding the instructions may cause damage to the unit.
- The unit is not intended for use in a hospital or medical environment.
- The unit is not intended for use by individuals with severe impairments or disabilities.
- The unit is not intended for use by individuals who are unable to understand the instructions.

Note:
- Do not use in locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- If the unit is wet.

Note:
- Do not inflate the arm cuff too high.
- Gently fold the air tube into the arm cuff in a spiral shape without stretching the air tube. If the air tube is not the right length, the measurement result may not be accurate.

Note:
- Please make sure that the air tube is not wrapped around other parts of your body when taking measurements. This could result in injury when the air pressure in the air tube is released.

Note:
- Remove any clothing interfering with the arm cuff. Consult your local authorized OMRON distributor or dealer.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity.

Note:
- Locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- The unit should be cleaned with a soft, dry cloth. Use a soft, moistened cloth and soap to clean the arm cuff.

Note:
- If the problem continues, try replacing the batteries.

Note:
- Do not apply more pressure than necessary.

Note:
- If the memory is full, the monitor will delete the oldest readings.

Note:
- Do not use the unit if it is damaged with scratches or dents.
- Please handle the unit carefully while using the unit.
- When using the unit, please follow the instructions in this manual. Disregarding the instructions may cause damage to the unit.
- The unit is not intended for use in a hospital or medical environment.
- The unit is not intended for use by individuals with severe impairments or disabilities.
- The unit is not intended for use by individuals who are unable to understand the instructions.

Note:
- Do not use in locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- If the unit is wet.

Note:
- Do not inflate the arm cuff too high.
- Gently fold the air tube into the arm cuff in a spiral shape without stretching the air tube. If the air tube is not the right length, the measurement result may not be accurate.

Note:
- Please make sure that the air tube is not wrapped around other parts of your body when taking measurements. This could result in injury when the air pressure in the air tube is released.

Note:
- Remove any clothing interfering with the arm cuff. Consult your local authorized OMRON distributor or dealer.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity.

Note:
- Locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- The unit should be cleaned with a soft, dry cloth. Use a soft, moistened cloth and soap to clean the arm cuff.

Note:
- If the problem continues, try replacing the batteries.

Note:
- Do not apply more pressure than necessary.

Note:
- If the memory is full, the monitor will delete the oldest readings.

Note:
- Do not use the unit if it is damaged with scratches or dents.
- Please handle the unit carefully while using the unit.
- When using the unit, please follow the instructions in this manual. Disregarding the instructions may cause damage to the unit.
- The unit is not intended for use in a hospital or medical environment.
- The unit is not intended for use by individuals with severe impairments or disabilities.
- The unit is not intended for use by individuals who are unable to understand the instructions.

Note:
- Do not use in locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- If the unit is wet.

Note:
- Do not inflate the arm cuff too high.
- Gently fold the air tube into the arm cuff in a spiral shape without stretching the air tube. If the air tube is not the right length, the measurement result may not be accurate.

Note:
- Please make sure that the air tube is not wrapped around other parts of your body when taking measurements. This could result in injury when the air pressure in the air tube is released.

Note:
- Remove any clothing interfering with the arm cuff. Consult your local authorized OMRON distributor or dealer.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity.

Note:
- Locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- The unit should be cleaned with a soft, dry cloth. Use a soft, moistened cloth and soap to clean the arm cuff.

Note:
- If the problem continues, try replacing the batteries.

Note:
- Do not apply more pressure than necessary.

Note:
- If the memory is full, the monitor will delete the oldest readings.

Note:
- Do not use the unit if it is damaged with scratches or dents.
- Please handle the unit carefully while using the unit.
- When using the unit, please follow the instructions in this manual. Disregarding the instructions may cause damage to the unit.
- The unit is not intended for use in a hospital or medical environment.
- The unit is not intended for use by individuals with severe impairments or disabilities.
- The unit is not intended for use by individuals who are unable to understand the instructions.

Note:
- Do not use in locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- If the unit is wet.

Note:
- Do not inflate the arm cuff too high.
- Gently fold the air tube into the arm cuff in a spiral shape without stretching the air tube. If the air tube is not the right length, the measurement result may not be accurate.

Note:
- Please make sure that the air tube is not wrapped around other parts of your body when taking measurements. This could result in injury when the air pressure in the air tube is released.

Note:
- Remove any clothing interfering with the arm cuff. Consult your local authorized OMRON distributor or dealer.

Note:
- Do not subject the main unit and cuff to extreme temperatures/ humidity.

Note:
- Locations exposed to vibrations, shocks or where it will be exposed to direct sunlight.

Note:
- The unit should be cleaned with a soft, dry cloth. Use a soft, moistened cloth and soap to clean the arm cuff.

Note:
- If the problem continues, try replacing the batteries.
