Patio Furniture Cover Measuring Guide

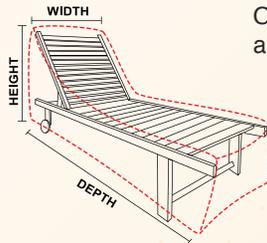

Chair Covers

Our Chair Covers are designed to fit a variety of chair styles and shapes. In order to make sure that you get the correct size and a good snug fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the chair. This is a straight line from the top of the back of the chair to the ground.
- Measure the width of the chair. This is the measurement from one edge of the back of the chair to the other.
- Measure the depth of the chair. This is the measurement from the front of the chair's seat to the back rest of the chair.
- Your chair cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

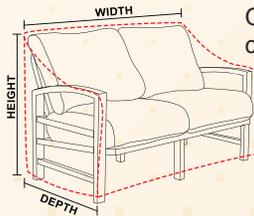

Chaise Covers

Our Chaise Covers are designed to fit a variety of chaise styles and shapes. In order to make sure that you get the correct size and a good snug fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the chaise. This is a straight line from the top of the back of the chaise to the ground.
- Measure the width of the chaise. This is the measurement from one edge of the back of the chaise to the other.
- Measure the depth of the chaise. This is the measurement from the front of the chaise's seat to the back rest of the chaise.
- Your chaise cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Sofa Covers

Our Sofa and Love Seat covers are designed to fit a variety of sofa styles and shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the sofa. This is a straight line from the top of the back of the sofa to the ground.
- Measure the width of the sofa. This is the measurement from one edge of the back of the chair to the other.
- Measure the depth of the sofa. This is the measurement from the front of the sofa's seat to the back rest of the sofa.
- Your sofa cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Ottoman Covers

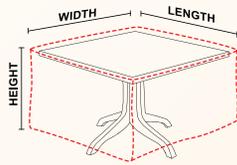

Our Ottoman covers are designed to fit a variety of ottoman styles and shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the ottoman. This is a straight line from the top of ottoman to the ground.
- Measure the width of the ottoman. This is the measurement from one edge of the ottoman to the other.
- Measure the depth of the ottoman. This is the measurement from the front of the ottoman to the back.
- Your ottoman cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Patio Furniture Cover Measuring Guide

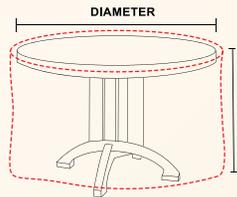

Square Table Covers

Our Square Table Covers are designed to fit a variety of square table shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the table. This is a straight line from the top edge of the table to the ground.
- Measure the length and width of the table. Since this cover is for a square table, these measurements are the same. Measure any of the table's edges.
- Your table cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Round Table Covers

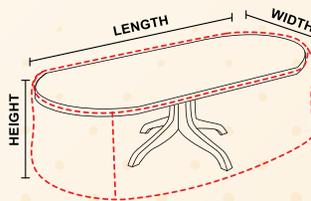

Our round table covers are designed to fit a variety of round table styles and shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the diameter of the table. This is a straight line across the top of the table.
- Measure the drop of the table. This is the measurement from the top of the table to the ground.
- Your table cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Oval Table Covers

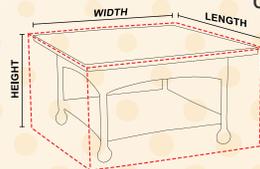

Our long oval table covers are designed to fit a variety of oval table shapes. Our long oval table covers can also fit most rectangular shaped tables. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the table. This is a straight line from the top edge of the table to the ground.
- Measure the length table. This measurement will be along the longest edge of the table. **Please note: all of our long table covers are oval shaped.** To determine the right size for your **Rectangular table**, subtract 12 inches from the total length listed for the oval cover; this is to accommodate for the oval shape. For example, if your rectangular table is 60" long, you will want to get the 72" Long Oval Table Cover, because $72 - 12 = 60$, the length of your table.
- Measure the width of the table. This measurement is taken across the top of the table.
- Your table cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Coffee Table Cover

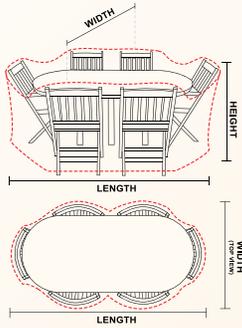

Our coffee table covers are designed to fit a variety of coffee table styles and shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the coffee table. This is a straight line from the top of coffee table to the ground.
- Measure the width of the coffee table. This is the measurement from one edge of the coffee table to the other.
- Measure the depth of the coffee table. This is the measurement from the front of the coffee table to the back.
- Your coffee table cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

Patio Furniture Cover Measuring Guide

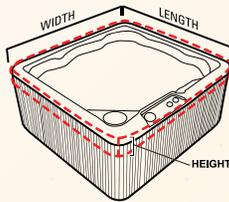

Table and Chair Combo Covers

Our table & chair combo Covers are designed to fit a variety of table & chair set styles and shapes. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the table & chairs. This is a straight line from the top of one of the chairs to the ground.
- Measure the width of the table & chairs. With the chairs pushed in, measure the width from one edge of the combo to the other. Make sure all the chairs are pushed in all the way.
- Measure the length of the table & chairs. With the chairs pushed in, measure the length from one edge of the combo to the other. Make sure all the chairs are pushed in all the way.
- Your table & chair combo cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.

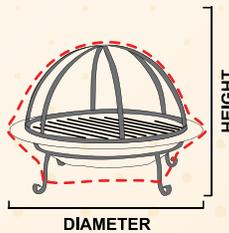

Hot Tub Covers

Our hot tub covers are designed to fit over the cap of a square hot tub. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the hot tub's heat resistant cover. This is a straight line from the top edge of the cover to the bottom.
- Measure the length and width of the hot tub. Since this cover is for a square hot tub, these measurements are the same.
- Your hot tub cover comes with a shock-cord hem. This will keep the cover secure in windy or stormy conditions.

Firepit Covers

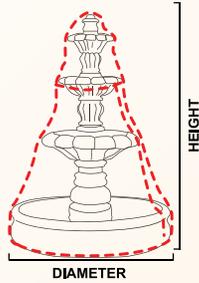

Our round fire pit covers are designed to fit over the cauldron of your small freestanding fire pit. It will accommodate most small fire pits. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of bowl of the fire pit. This is a straight line from the top edge of the bowl (or lid of the bowl) to the bottom.
- Measure the diameter of the fire pit bowl. This is a straight line across the center of the fire pit bowl.
- Your fire pit cover comes with a shock-cord hem. This will keep the cover secure in windy or stormy conditions.

Patio Furniture Cover Measuring Guide

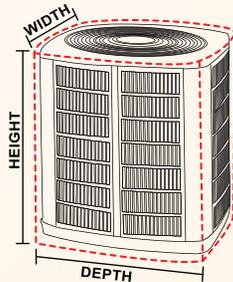

Fountain Covers

Our round outdoor fountain covers are designed to fit over the fountain head and base of your outdoor fountain. It will accommodate round fountains up to 48" tall and 30" in diameter at the base. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of the fountain. This is a straight line from the top edge of the fountain to the base. Don't measure ON the fountain at an angle, measure next to it in a straight line.
- Measure the diameter of the base of the fountain. This is a straight line across the center of the fountain base-- not around the base.
- Your fountain cover comes with a shock-cord hem. This will keep the cover secure in windy or stormy conditions.

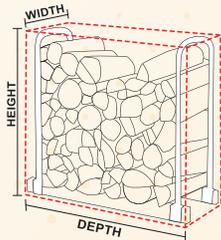

Air Conditioner Covers

Our air conditioner covers are designed to fit free-standing square central air conditioning units. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of your air conditioner from the bottom up to the highest point. This is a straight line from the top edge of the air conditioner to the base.
- Measure the length of the air conditioner. This is a straight line from the left or right edge of the air conditioner to the other.
- Measure the width of the air conditioner. This is the distance horizontally from the front of the air conditioner to the back.

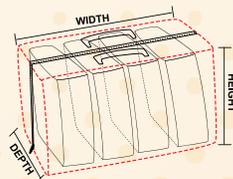

Log Rack Covers

Our log rack covers are designed to fit 4ft and 8ft wide log racks. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of your log rack from the bottom up to the highest point. This is a straight line from the top edge of the Log Rack to the base.
- Measure the depth of the log rack. This is the distance horizontally from the front of the log rack to the back.
- Measure the width of the log rack. This is a straight line from the left or right edge of the rack to the other.

Cushion Storage Bags

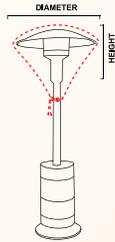

Our cushion storage bags are designed to fit up to 6 large patio furniture cushions. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Add up the length, width, height and depth of all your cushions stacked up.

Patio Furniture Cover Measuring Guide

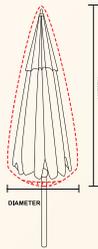

Heater Covers

Our heater covers are designed to fit a variety of heater styles and shapes. In order to make sure that you get the correct size and a good snug fit, please refer to the illustration on the left and follow these simple instructions:

- With the heater turned off, measure the height. This is a straight line from the top of the heater to the bottom of the top portion, not to the bottom of the base.
- With the heater turned off, measure the diameter. This is the distance across the top of the heater.

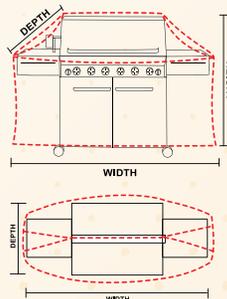

Umbrella Covers

Our umbrella covers are designed to fit a variety of umbrella heights. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- With the umbrella closed, measure the height. This is a straight line from the top of the umbrella to the base, not to the bottom of the pole.
- With the umbrella closed, measure the diameter. This is the distance across the base of the closed umbrella.

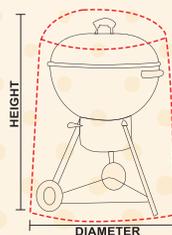

BBQ Grill Covers

Our grill & BBQ covers are designed to fit a variety of grill & BBQ sizes and styles. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height. This is the distance from the highest point of the grill to the ground.
- Measure the width. This is the distance from the farthest edge of the grill to the other.
- Measure the depth. This is the distance horizontally from the front of the grill to the back.
- Your grill & BBQ Cover will come with a unique strap and buckle system. This will keep the cover secure in windy or stormy conditions.
- Measuring properly when ordering your BBQ cover is the key to ensuring a proper fit.

Smoker Covers

Our smoker covers are designed to fit free-standing smoker units. In order to make sure that you get the correct size and that you achieve a perfect fit, please refer to the illustration on the left and follow these simple instructions:

- Measure the height of your smoker from the bottom up to the highest point. This is a straight line from the top edge of the smoker to the base.
- Measure the length of the smoker. This is a straight line from the left or right edge of the smoker to the other.
- Measure the width of the smoker. This is the distance horizontally from the front of the smoker to the back.
