Inserting and Removing Batteries

[Insert image of inserting batteries into remote control]
Congratulations!

Thank you for purchasing the Cambridge SoundWorks® Ambiance Touch Radio! We are sure that it will provide you with years of enjoyment and entertainment! Happy listening!

The Ambiance Touch Radio is a cutting-edge, multi-format digital audio system, featuring Wi-Fi Internet streaming capabilities and an innovative color touchscreen interface.

Introduction

As a standalone device, your radio functions as an AM/FM receiver, as well as an iPod/iPhone docking station and alarm clock.

Connected to a wireless broadband network, your radio can receive thousands of Internet radio stations and podcasts from around the globe.

On the same wireless network as your computer, your radio can also act as a remote streaming device for your music collection.
Using the Touchscreen Interface

On the Ambiance Touchscreen Radio, the touchscreen is the key point of interaction. Simply tapping gently on the icons and buttons on the screen can control the radio’s functions. Some of these icons and buttons allow you to tap and hold to change a value while you keep your finger on it (e.g. increasing volume).

Main Menu

Radio (AM/FM) Receives AM and FM broadcasts, including RDS data. See page 9

Pandora (US only) Personalized interactive radio stations based on your choice of artists and songs, similar music analysis. See page 10

Internet Radio Allows access thousands of online radio stations and podcasts from around the world. See page 11

Settings Allows you to configure Network settings, sound EQ levels, software updates, timing preferences and many more. See page 12

Auxiliary Mode Use the radio to play audio from any external source via a standard 3.5mm audio cable. See page 14

iPod Mode Provides docking, charging, control and playback for your Apple iPod and iPhone. See page 15

Music Player Lets you stream audio files across your network from PC or MAC. See page 17

Navigation Arrows Tap to reveal other main menu icons.
Setup Wizard

When you power up your radio for the first time, the setup wizard will guide you to configure the radio settings.

Step 1: Using the remote, elect ‘YES’ to start setup wizard. If you select ‘No’, you may start Setup Wizard at a later time by going to ‘Settings’->’Setup Wizard’

Step 2: Select the language

Step 3: Select the time format 24h or 12h

Step 4: Select source to sync Time

Step 5: Select time Zone

Step 6: Turn on or off Daylight Saving

Step 7: Select WLAN Region
7.

Step 8: Select your preferred network from the list of available networks

Step 9: If the selected network is password protected, enter the password in using the on-screen keyboard, followed by Confirm.

Step 10: Press ‘OK’ to complete the setup.
Navigating Around

Tapping on a mode will take you to the main screen of that mode. Each mode will have its own set of buttons that you can interact with. An example is shown below:

This upper area is not touch-activated but provides quick summary information on Time, Alarm, Sleep and Network status.

This central area displays information on the selected mode.

This bottom area holds the navigation buttons for the selected mode.

This bottom area holds the navigation buttons for the selected mode.

Internet Setup

Ambiance Touch Radio makes use of your local wired or wireless network.

The easiest way to get started is to simply enter Internet Radio mode, where you will be led through the process of connecting to your network and getting online.

Step 1: Select your WLAN region from the list to begin scanning.

Step 2: Select your preferred network from the list of available networks.

Step 3: If the selected network is password protected, enter it in using the on-screen keyboard, followed by Confirm.
Radio Mode (AM/FM)

Radio Mode receives analog radio from the AM or FM band and displays Radio Data System (RDS) information about the station and show being broadcast.

Before entering Radio mode, connect both the AM and FM aerials to their respective Antenna connector at the rear of the radio and fully extend the aerial.

From the main menu, tap:

You will see the following screen, with your last selected AM or FM frequency displayed.

Navigating Radio Stations

You can use the frequency scale across the center of the screen to search for radio stations. Simply tap any part of this scale to tune the radio to the corresponding radio frequency.

The following actions are available on this screen.

- **AM**: Select the AM radio frequency band.
- **FM**: Select the FM radio frequency band.
- **T**: Tune the radio frequency up one step at a time.
- **B**: Tune the radio frequency down one step at a time.
- **S**: Scan up the radio frequency till the next available station is found.
- **D**: Scan down the radio frequency till the next available station is found.

For stations with good signal strength that broadcast RDS (Radio Data System) information, the screen will display the RDS data.

Favorite Station Presets

You can store up to 10 favorite station presets in Radio Mode.

- **Add**: Add the station you are listening to as a new favorite. Select a slot in your Favorites list to save to. If there is an existing favorite in the slot you selected, it will be replaced automatically.

- **Review**: Review your Favorites list. Select the favorite station you want by tapping the corresponding slot.

Current settings

This displays the full details of your currently active network profile. This can be useful for troubleshooting.

WLAN region

Change the global location of your radio. The currently selected location is outlined.

Miscellaneous Settings

Lets you set a range of preferences for your radio.

- **Language**: The default language is English. To change, just pick an option from the available list.

- **Alarm Snooze**: Lets you specify the delay interval between alarms. Configurable from 1 to 30 minutes.

- **Idle Timeout**: This setting lets you specify the time interval where there is no interaction with the radio before switching to a screensaver mode.

- **Sleep**: This is a handy function that automatically switches the radio into standby mode after a specified time period.

The default setting is “Off”.

You can adjust the specified time by tapping the Sleep button on the screen or the remote control multiple times to cycle through the options of 15, 30, 45, 60, 75, 90, 105 or 120 minutes.

If Sleep mode is activated, a crescent moon icon with the time remaining will be displayed on the top part of the screen.

Software Update

Software updates for maintenance or added features for your radio will become available from time to time. If this option is enabled, the radio will automatically check for new software every time it connects to the Internet. If an update is available, it will ask for your confirmation before commencing download. Software updates may take a few moments to download and require you to restart the radio.
Pandora Mode

Pandora is a personalized Internet radio that is designed to help you discover new music you will love mixed in with music you already know. You start a Pandora station by entering an artist name or song title that is similar to the kind of music you will like to hear and Pandora will find and play similar songs from a related corner of the musical universe.

Before using Pandora, you need to create an account with them by visiting www.pandora.com. Pandora is a free service with the option to pay for additional features.

From the menu, tap:

The first time you start Pandora, you’ll be asked to sign-up for a new account. If you already have one, tap OK and you’ll be given a registration activation code. Enter the activation code onto your computer to first set up Pandora on the Ambiance.

Once you have logged in successfully, your details will be saved so you do not have to re-enter them when you return.

You can save several Pandora accounts to your Ambiance Touch Radio. Go to the Pandora Submenu and select “Add new account”.

Navigating Pandora Radio Stations

There are several different types of streams and radio stations available via Pandora.

Browse Station list

Display your list of stations that you have already saved to your Pandora account. You may also <Create New Station> here. Create a station by entering all or part of an artist or band name using the onscreen keyboard, followed by the search button. Select your choice from the list of results, and then tap OK.

Return to playing screen

Exits the submenu and returns to the Now Playing screen.

Current users

Displays the account username.

Add new account

Adds new Pandora account.

Edit Stations

Rename or delete station.

Using Pandora

Once you have started playing a radio station using one of the options listed earlier, you will see a screen similar to the one below on your display.

The following actions are available on this screen.

- View station information.
- View technical information about the station that you are listening to.
- Bookmark this track or this artist.
- Plays the currently selected song.
- Stops playing the currently selected song.
- Plays the next song.
11. **Internet Radio Mode**

Ambiance Touch Radio can play radio broadcasts from stations all around the world using your broadband Internet connection. Listen to thousands of radio stations and podcasts and discover music from different countries.

From the main menu, tap:

![Internet Radio]

The first time you enter Internet Radio mode, you will be taken to the main Station Directory menu screen.

When entering Internet Radio mode, the last-listened to station is selected automatically.

**Using Internet Radio**

Once you have started playing a radio station using one of the options listed earlier, you will see a screen similar to the one below on your display.

![Internet Radio Station]

The following actions are available on this screen.

- Display the Station Directory menu screen.

- Display technical information about the station that is currently playing.

- Add the station you are listening to as a new favorite. Select a slot in your Favorites list to save to. If there is an existing favorite in the slot you selected, it will be replaced automatically.

**Navigating Internet Radio Stations**

**My Favorites**
Displays a list of your favorite radio stations and podcasts that you have saved.

**Local <Country>**
Browse through the radio stations that are available in your country. To change country, go to **Internet radio -> Browse station list -> Stations -> Location**.

**Stations**
Browse for radio stations sorted by location or genre. You can also search for radio stations.

**Podcasts**
Browse for podcasts sorted by location or genre. You can also search for podcasts.

**My added stations**
Displays a list of stations that you have added to your station list.

**Help**
Get your Ambiance Touch Radio’s unique access code or listen to some troubleshooting tips.

**Submenu Options**

- **Browse station list**
  Displays the Radio Station menu.

- **Return to playing list**
  Exits the Submenu and returns to the Now Playing screen.

- **Last Listened**
  Displays a list of recently listened to stations. The most recent station will appear at the top of the list.

**Searching for Stations and Podcasts**

In the Station Directory menu, you can search for radio stations and podcasts by name or by a keyword in its title or description.

Type in keyword or station name using the onscreen keyboard, followed by the Search button. Any matching results will be displayed, simply select a station from the list to begin playing it.
12.

**Settings**

The **System Settings** menu provides a convenient place to configure all the radio settings. The following options are available:

- Alarms
- Time and Date
- Equalizer
- X-Fi
- Network
- Miscellaneous
- Setup Wizard

From the main menu, tap:

![Settings Icon](Image)

**Alarms Settings**

This is an alternative method to access your radio’s alarm clock settings, which is directly accessible from the main menu screen. To learn more about configuring your radio’s alarms, refer to page 18

**Time and Date Settings**

By default, the radio will automatically set its time and date when you connect to the Internet. However if you do need to set or change it yourself, the Time Settings menu includes the following options:

**Time Zone**
This setting displays a list of global time zones to choose from. The current setting is highlighted in yellow.

**Use Analog Clock**
Tap to select whether to show the time using an analog clock display when the radio is on standby.

**Turn on/off Daylight Saving**
Tap to toggle daylight saving on or off.

**Time Source**
Lets you specify where the radio should sync its clock. By default, this is set to fetch time from the Internet. You can select the time to sync source to “None” if you wish to set it yourself. For “DAB” or “FM-RDS” modes, you need to receive a good station signal for several seconds to extract the time data.

**Set Time Manually**
Lets you set the time and date yourself. Use the Up/Down buttons to adjust the time. Tap the Back button to save your changes and it will take you to the previous screen.

**Select 12h/24h**
Tap to toggle between the 12 and 24-hour clock display format.

**Equalizer Settings**

By default, the radio is set to “Normal” EQ, which is an all-around, relatively neutral option. You can choose from a range of alternative presets suited for the following musical styles:

- Classic
- Jazz
- Pop
- Rock
- Speech

You can also select “Custom” to set your own preferences Bass, Treble and Loudness.

Tap the Back button to save your settings and return to the previous screen.

**X-Fi Settings**

Lets you enhance your audio listening experience with the following options:

**Surround**
Control the level of audio immersion in your music.

**Crystallizer**
Enhance music to make them sound livelier.

**Bass**
Enhance the sound quality and bass of any speaker system for a better listening experience.

**Dialog Plus**
Enhance the vocals in music for better clarity.

**Smart Volume**
Adjust the loudness of your audio playback automatically to minimize sudden volume changes.

**Network Settings**

Ambiance Touch Radio is able to remember the last four wireless networks that you have connected to, and automatically tries to connect to whichever one that it can find. You can configure these settings using the following options:

**Network Wizard**
This setting lets you scan the area for any available wireless network. To connect, just select the network from the list, followed by the type of security you want to use: PIN number, Push button or no WPS.

If you are using a wired Internet connection, you can select it here.

For advanced users, you can setup the network yourself by selecting Manual settings, which will walk you through a detailed multiple-step process.

**WPS push button setup**
Setup the radio with your network using the Wi-Fi Protected Setup (WPS) security protocol.

**Network profiles**
This displays a list of your saved network profiles. Switch to any one of your profiles by selecting it. You can delete an existing profile by tapping the Delete button next to it.

**NOTE** You cannot delete the currently active network profile.

You can also run the Network Wizard explained above.
Manual settings
For advanced users, you can setup the network yourself using the multiple-step process.

Current settings
This displays the full details of your currently active network profile. This can be useful for troubleshooting.

WLAN region
This lets you change the global location of your radio. The currently selected location is outlined.

Miscellaneous Settings
Lets you set a range of preferences for your radio.

Language
The default language is English. To change, just pick an option from the available list.

Alarm Snooze
Lets you specify the delay interval between alarms. Configurable from 1 to 30 minutes.

Idle Timeout
This setting lets you specify the time interval where there is no interaction with the radio before switching to a screensaver mode.

Sleep
This is a handy function that automatically switches the radio into standby mode after a specified time period.

The default setting is “Off”.
You can adjust the specified time by tapping the Sleep button on the screen or the remote control multiple times to cycle through the options of 15, 30, 45, 60, 75, 90, 105 or 120 minutes.

If Sleep mode is activated, a crescent moon icon with the time remaining will be displayed on the top part of the screen.

Software Update
Software updates for maintenance or added features for your radio will become available from time to time. If this option is enabled, the radio will automatically check for new software updates every time it connects to the Internet. If an update is available, it will ask for your confirmation before commencing download. Software updates may take a few moments to download and require you to restart the radio.

Check for Updates
If you do not want the radio to automatically check for new software, select this option to check for updates on-demand. If there is new software update available, you will be asked to confirm whether your wish to proceed to download.

Standby backlight
This setting lets you adjust the brightness of the radio’s display by using a sliding bar. Default setting is maximum. Tap the Back button to save your changes.

Software Version
Displays your radio’s current software installation version.

Factory Reset
This option resets the radio to its default factory values, erasing any personal settings, which may have been configured.
You will be asked for confirmation before factory reset is being carried out.

Setup Wizard
Please refer to the section on “Setup Wizard” on page 6
14.

**Auxiliary Mode**

Auxiliary mode allows you to play audio from almost any external source (e.g. MP3 player) through your Ambiance Touch Radio.

Turn the volume of both Ambiance Touch Radio and your external device low before connecting.

Connect your external device using a cable to the 3.5mm Aux Input jack of Ambiance Touch Radio.

From the main menu, tap:

![Aux Input](image)

Adjust the volume of Ambiance Touch Radio and your external device to the desired level.

**NOTE**: Ambiance Touch Radio only provides amplification audio for your external device. Use the controls on your external device to handle playback.
iPod Mode

Ambiance Touch radio has a dock that makes setup effortless with your iPod or iPhone. You can use Ambiance Touch Radio as a high quality amplifier and even charge your device while it is docked.

Docking your iPod/iPhone

Remove the dock cover at the top of the radio with your fingernail.

Note: Retain the cover in order to conceal the dock when it is not in use, especially for long period of time.

Mount your iPod or iPhone carefully onto the dock. Ambiance Touch Radio will ask if you want to switch to iPod mode. Tap Yes. You can also enter iPod mode from the main menu by tapping:

Using iPod Mode

The following actions are available on this screen.

- Cycle between the Repeat Once, Repeat All and No Repeat options.
- Turn on or off shuffled playback of your playlist.
- Skip to the next song in the playlist. Tap and hold to fast-forward the currently playing song.
- Skip to the previous song in the playlist. Tap and hold to rewind the currently playing song.
- Plays the currently selected song.
- Stops playing the currently selected song.

The track title, artist name, album title, current position and track duration information are displayed on screen when the track is being played.

Control and Playback

You can use Ambiance Touch Radio’s touchscreen interface or the remote control to operate the basic playback features of your device.

You can access other features and controls of your iPod or iPhone as normal while it is docked on the radio. Only the volume control will be disabled. Use the radio’s volume control to adjust the volume.

Models compatible with your radio

- iPod touch 4th generation
  - 8GB 32GB 64GB
- iPod touch 3rd generation
  - 32GB 64GB
- iPod touch 2nd generation
  - 8GB 16GB 32GB
- iPod touch 1st generation
  - 8GB 16GB 32GB
- iPod Nano 6th generation
  - 8GB 16GB
- iPod Nano 5th generation
  - (video camera) 8GB 16GB
Music Player Mode

In Music Player mode, you can browse and play audio files wirelessly from any PC or Mac computers across your network. Once you have set up your computer for sharing, you can browse your digital music collection via different categories such as Artist Name, Album Title or Genre.

From the main menu, tap:

You will see the following screen

The following actions are available on this screen

- View information about the song that you are listening to.
- View technical information about the station that you are listening to.
- Add the station you are listening to as a new favorite. Select a slot in your Favorites list to save to. If there is an existing favorite in the slot you selected, it will be replaced automatically.
- Cycle between the repeat once, repeat all and no repeat options.
- Turn on or off shuffled playback of your playlist.
- Skip to the previous song in the playlist. Tap and hold to rewind the currently playing song.
- Skip to the next song in the playlist. Tap and hold to fast-forward the currently playing song.
- Plays the currently selected song.
- Stops playing the current song.

Submenu Options

Repeat
Toggle repeat playback on/off.

Shuffle
Toggle shuffled playback on/off.

Add to My Playlist
Add the current song to your playlist.

Clear My Playlist
Remove all songs from the current playlist.

Return to playing screen
Exits the Submenu and returns to the Now Playing screen.

Streaming Audio Setup

Touch Radio uses the UPnP (Universal Plug and Play) protocol to play digital music files from your PC or Mac computer. First you must configure your computer for media sharing.

These are the recommended system requirements:
- For a Windows PC, use Windows Media Player (WMP) version 11 or higher.
- For a Mac computer, it should be running OS X or later with a UPnP application installed to access an iTunes library.

NOTE
- There are alternative UPnP platforms which can be used, but the following instructions are for WMP.
- iTunes does not currently operate an UPnP media server, but there are a number of third-party software applications (free downloads), which can enable you to access your iTunes library.
Alarm Settings

The radio comes with two alarm clocks and each of these can be programmed differently. To configure the alarm settings, from the main menu screen, tap one of the alarm icons.

Each alarm has an on/off toggle button and four adjustable settings. Tap any setting to review or edit it.

### Enable
Set the alarm to go off Daily, Once, Each Weekday or Each Weekend Days. If you select “Once”, you will also need to set a specific date. You can also turn the alarm off.

**NOTE** When setting the alarm to Off, use the Back button after selecting it instead of the Next and Prev buttons, otherwise the Off setting will not be saved.

### Time and Date (if applicable)
Set the alarm to go off at your desired time.

### Source
Set the alarm to wake you with audio from one of the following modes: DAB Radio, Radio, iPod, Internet Radio, Last.fm, Pandora or Buzzer.

### Volume
Set the volume level of the alarm from 0-30.

### Alarm Snooze

When an alarm goes off, you will see the following screen flashing:

Tap anywhere on the touchscreen to “Snooze” the alarm. This puts the radio back into standby mode with the following screen displayed.

Tap the **Alarm Off** button at the top of the screen to turn the alarm off.

The snooze time remaining is displayed at the bottom of the screen. Tap it once to reset the countdown. Tap it multiple times to increase the duration by an additional five minutes each time.

The initial snooze duration can be set in the **System Settings** menu.

Tap “Miscellaneous Settings”, then “Alarm Snooze”. The snooze interval can be set from 1 to 30 minutes.
Other Information

Warranty

Warranty information is supplied with your product. Please keep your Proof of Purchase for the duration of the Warranty period.
**FAQ**

<table>
<thead>
<tr>
<th>Question:</th>
<th>Answer:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Why isn’t my Mac connecting with the Ambiance and saying the device doesn’t have necessary accessories?</td>
<td>Turn on Bluetooth from your Mac. Set up new device, and press continue.</td>
</tr>
<tr>
<td>2) How do I control the volume on the Ambiance?</td>
<td>Move your finger up and down between the glowing dots located on the top of the Ambiance to control the volume.</td>
</tr>
<tr>
<td>3) Why does the Ambiance reboot while I’m listening to Pandora?</td>
<td>The Ambiance way reboot from time to time when there is a weak internet connection. The Ambiance will automatically reboot when searching for a stronger connection.</td>
</tr>
<tr>
<td>4) How do I wake the Ambiance when on sleep mode?</td>
<td>Touch the power button located on the top of the Ambiance.</td>
</tr>
<tr>
<td>5) Why isn’t DNLA work on my Mac or Apple device?</td>
<td>The Ambiance 2 can stream music wirelessly from your PC with Windows Media Player 11 or from an iPhone/iPad with the App SyncStream downloaded from the App store. The PC, iPhone, iPad and Media Player just need to be on the same network to share music and you can then select your PC or iPhone/iPad from the Ambiance’s color touch display.</td>

1 Read these instructions.
2 Keep these instructions.
3 Hear all warnings.
4 Follow all instructions.
5 Do not use this apparatus near water.
6 Clean only with dry cloth.
7 Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8 Do not install near heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10 Protect the power cord from being walked on or pinched, particularly at the point where they exit from the apparatus.
11 Only use attachments/accessories specified by the manufacturer.
12 Use only with the cart, stand, tripod, bracket or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13 Unplug this apparatus during lightning storms or when unused for long periods of time.
14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15 Do not expose this apparatus to drips or splashes.
16 Do not place any object filled with liquids, such as vases, on the apparatus.
17 Do not install this apparatus in a confined space such as a bookcase or similar unit.
18 The apparatus draws nominal non-operating power from the AC outlet with its STANDBY/ON switch in standby position.
19 The apparatus should be located close enough to the AC outlet so that you can easily grasp the power cord plug at any time.
20 Disconnect the product from the AC mains power by removing the product’s AC power plug from the AC power outlet.

Removable Battery
21 The battery must be recycled or disposed of properly. Contact local agencies for recycling and disposal information.
22 Do not allow metal objects to touch the terminals of your battery.
23 If there is leakage, an offensive odor, discoloration or deformation during charging or use, remove the battery and do not use it again. Clean your hands well before touching food or sensitive areas, for example, your eyes.

Wireless Device
24 Switch off the device where it is prohibited, or when its use may cause danger or interference such as inside an aircraft, hospitals, or near refueling points.

Radio Frequency
Operation Frequency Range ---- 2412-2484MHz
Channel Number or List ---- Ch1 to Ch14 (refer to the link for the channel frequency) Channel Separated ---- Overlap
Modulated Type ---- OFDM/DSSS
Antenna Type ---- integrated PIFA antenna.
Operating RF distance: normal 30-50m, many factors will affect this parameter.
RF transmitter power output: 15dBm

CAUTION
- DO NOT REMOVE THE EXTERNAL CASES OR CABINETS TO EXPOSE THE ELECTRONICS. NO USER SERVICEABLE PARTS ARE INSIDE.
- IF YOU ARE EXPERIENCING PROBLEMS WITH THIS PRODUCT, CONTACT CAMBRIDGE SOUNDWORKS FOR A SERVICE REFERRAL. DO NOT USE THE PRODUCT UNTIL IT HAS BEEN REPAIRED.

For CANADA

WARNING: TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

All cables used to connect to the computer and peripherals must be shielded and grounded. Operation with non-certified computers or non-shielded cables may result in interference to radio or television reception.
Federal Communication Commission (FCC) Interference Statement

FCC Part 15: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
* Reorient or relocate the receiving antenna.
* Increase the separation between the equipment and receiver.
* Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
* Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

CAUTION: To comply with the limits of the Class B digital device, pursuant to Part 15 of the FCC Rules, this device must be installed with computer equipment certified to comply with Class B limits.

MODIFICATION: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER AUTHORITY TO OPERATE THE EQUIPMENT.

California Proposition 65 Statement

WARNING: Handling this product may expose you to chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Wash hands after handling.

Explanatory Note: California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) requires special product labeling for products containing certain chemicals known to the State of California to cause cancer, birth defects or other reproductive harm. SoundWorks has chosen to provide a warning based on its knowledge about the presence of one or more listed chemicals without attempting to evaluate the level of exposure. With SoundWorks products, the exposure may be below the Proposition 65 level of concern, or could even be zero. However, out of an abundance of caution, SoundWorks has elected to place the Proposition 65 warning on its products.

Déclaration de la Proposition 65 de la Californie

AVERTISSEMENT: La manipulation de ce produit peut vous exposer à des produits chimiques qui sont reconnus par l'État de la Californie comme pouvant provoquer le cancer, des anomalies congénitales ou d'autres effets nuisibles à la reproduction.

Veillez vous laver les mains après l'avoir manipuler.

Note explicative: La Proposition 65 (California Safe Drinking Water and Toxic Enforcement Act of 1986) de la Californie sur les matières dangereuses et l'eau potable exige un étiquetage spécial pour les produits contenant certains produits chimiques qui sont reconnus par l'État de la Californie comme pouvant provoquer le cancer, des anomalies congénitales ou d'autres effets nuisibles à la reproduction. SoundWorks a choisi d'inclure une mise en garde s'appuyant sur sa connaissance de la présence d'un ou de plusieurs de ces produits chimiques sans essayer d'en évaluer le niveau d'exposition. Pour les produits de SoundWorks, le niveau d'exposition peut être inférieur au niveau critique établi par la Proposition 65 ou même être nul. Néanmoins, par souci extrême de prudence, SoundWorks a choisi de placer l'avertissement de la Proposition 65 sur ses produits.
