How to Pair Bluetooth Device with headphones

Pair Your Bluetooth headphones

Note: Bluetooth headphones should be paired with mobile phone before you pick up calls with headphones.(Pair means to establish connection among Bluetooth devices, and let mobile phone store the headphones unique ID at the same time. headphones will connect to mobile phone automatically once they are paired.)

1. Put the headphones close to mobile phone (on the range of 1 meter) and turn the power button to “ON” and the Blue and Orange led will flash by turns. Then, the headphone is under Bluetooth pairing mode.
2. Search and find Bluetooth headphones ID via Bluetooth WiFi with mobile phone. Please refer to the manual of mobile phone for its Bluetooth operation..

3. Choose the headphones and set up the connection between headphones and mobile phone.
4. Input pass code “0000” if needed. Headphone will be stand-by when the connection is finished. The blue led flashes.
5. Now you can dial, answer or hang up calling with Bluetooth headphones.
Remark: If there is no pairing operation to headphones in 5 minutes, the headphones will automatically exit the pairing state.

Answer or Hang up Calling with Bluetooth Headphones

1. When calling comes in, headphone will be vibrating to indicate the calling, you can answer calling by pressing  button.

2. When calling is finished, you can hang up calling by pressing  button. If the other side hangs up already, it's no need to press this button.
3. Last called phone number will be redialed, if long press  button when the Bluetooth headphones is not in calling status. (Only if your portable device support this headphone function)

Note: When headphone is playing music via A2DP, pls pause the music and then long press  to redial last called phone number.

Reject the Coming Call with the Bluetooth Headphones

The coming callings can be rejected by long pressing  button once

Calling Transfer between Headphones and Mobile Phones

To transfer a call from the headphones back to the phone, press and hold  on the SwageU. The flashing LED indicator will turn orange. The Bluetooth headphones can still control the phone, press and hold  again to transfer the call back to the headphones.
