

ACTIVARMR®

JOBSITE GEAR

While handling concrete, wood or metal debris, the patented ActivArmR® Heavy Laborer glove provides superior all-day wear comfort with the ultimate protection from punctures, cuts and abrasions.

Ansell ActivArmR® gloves for construction professionals offer the optimal balance of protection, dexterity and comfort.

Made with Ansell's patented Intercept Technology®, the ActivArmR® Heavy Laborer glove is crafted of stainless steel & DuPont™ Kevlar® fibers, giving it an ANSI Level 4 cut protection.

Its palm has re-enforced gel padding to reduce vibrations and impacts in critical stress zones, and is dipped in foam nitrile to provide advanced grip in wet/dry conditions.

With this glove, you don't have to sacrifice comfort for protection. The ergonomic design and breathable construction provide the ability to accomplish a variety of tasks with the gloves still on.

HEAVY LABORER Glove

6X more cut protection than standard leather gloves*

Re-enforced gel padding reduces vibrations and impacts

*Results based on Ansell's internal results of the ActivArm liner with Intercept Technology vs. standard leather gloves (3/11). CAUTION: Products that provide "cut resistance" and "cut protection" or "puncture resistance" and "puncture protection" do not completely prevent or eliminate the potential for cuts or punctures, and are not intended or tested to provide protection against powered blades, serrated or other sharp or rotating equipment. Products that provide "impact" or "vibration" "protection" or "reduction" provide cushioning or a level of attenuation of force or vibration, but do not completely eliminate the potential for impact-related or vibration-related injuries or effects. Users are encouraged to always use caution and care when handling sharp materials or in potentially dangerous environments. Any information or data provided is based upon Ansell's current knowledge and understanding of the subject matter, and is offered solely as a possible suggestion for use in making your own decisions or product choices. Product users should conduct all appropriate testing and other evaluations to determine the suitability of Ansell products for a particular purpose or use within a particular environment. It is the responsibility of a product user to assess the level of risk and to determine the protective equipment required or appropriate for the user's particular purpose.
