**ONETOUCH™**  
**7100 USB**

**• 48-bit Color • 1200x4800 dpi • USB Interface • Win 98/2000/ME/XP**

The OneTouch 7100 USB is perfect for the home or small office user who wants a fast and easy to use scanner for establishing a paperless office or creating colorful projects for print or Internet use. It's never been easier to Capture Memorable Moments and share them with others

### Award-winning Software

#### ScanSoft PaperPort Deluxe 7.0

The world's best-selling document and image management application creates thumbnails of everything you scan allowing easy filing in color-coded folders. Built-in OCR (Optical Character Recognition) allows you to easily use the scanner's OCR button to scan printed text directly into your word processor where it is fully editable.

#### ArcSoft PhotoImpression published by Visioneer

PhotoImpression allows you to edit, retouch, enhance and manipulate your photos, turning them into compelling visuals for inclusion in hundreds of projects.

### Features and Benefits

#### Superb Image Quality

48-bit internal color capability recognizes over 281 trillion colors. 48-bit scanners capture more detail in the shadow and highlight areas of an image than their 42-bit predecessors, so you'll get brighter yellows, richer reds, cooler blues, and everything between.

#### High Resolution

1200 x 4800 dpi optical resolution eliminates jagged edges and captures the finest detail from your original. That's enough resolution to turn a 4" x 6" photo into a 16" x 24" image with no loss of detail.

#### Easy to Use

Just press a OneTouch button to scan and send an image to the destination of your choice. While intelligent default button settings give perfect results on common scanning tasks, the OneTouch preferences utility makes it simple to customize the buttons if needed.

#### Reliability

Visioneer is known for high quality, easy to use scanning solutions and has some of the highest customer satisfaction and repeat buyer rates in the industry.
